#### CHINESE GROUP WINS FAVOR AT PACIFIC COUNCIL

Republic's Case and Personnel of Representatives Are Making Impression

NATIONAL AUTONOMY IS STRONGLY PLEADED

Orientals Present Their Views on Tariff, Extraterritorial Rights, and Immigration

By PAUL HUTCHINSON Managing Editor of The Christian

HONOLULU, T. H., July 9 (By Mail) -The most conspicuous success so in the Institute of Pacific Relations has been won by the members from China. If China-could be as effective in settling her internal problems as she invariably seems to be in im-pressing international gatherings, she would soon take her place among the great powers. It is an open secret that, although China lost her contention at the Paris peace conference, her delegates won a re-

markable personal success there. At the Washington conference, the same conquest of sympathies proved easy for the men from the distracted Oriental republic. Now the Institute of Pacific Relations is beginning to acknowledge, the strength of the ditions and the hope for a tax reduc-Chinese case, while there is a grow-ing admiration for the qualities evi-Coolidge today by Charles Curtis denced by the individual Chinese

Delegation's High Ability

The strong men of the Chinese delegation have proved to be T. Z. Koo, L. T. Chen. Ta Chen, James Y. C. Yen and S. T. Wen. Mr. Koo is on his way back to China after spending 11/2 years in Europe and America as a traveling secretary of the World's Christian Student Fedtive of the National Anti-Opium So ciety of China at the International Opium Conference, held in Geneva. There are many who are speaking of Mr. Koo as the most brilliant and should provide for some assistance in influential attendant at this institute. co-operative marketing.

#### Methodists Ask Britain to Stop Export of Liquor to Bahamas

By Cable from Monitor Bureau

London, July 20 RESOLUTION calling upon the British Government to prohibit A the exportation of liquor to the Bahamas for "transference to the United States in violation of the prohibition law" has been passed by the Methodist Wesleyan conference, now in session at

Sir Robert Perks, supporting this resolution, said that ship-owners and underwriters should also be approached to prevent the

carriage and insurance of this liquor.

Walter Runciman, Liberal member of Parliament for Swansea, speakinf later, said he could not understand how anybody engaged in this trade could "sleep comfortably in his bed."

Another resolution passed, supports the Temperance Council of Christian Churches program for dealing with intemperance, money-lending, gambling, improper press reports, and Sunday amusements.

The Rev. Henry Carter, in this connection, declared "The battle against drink can be word in this generation."

The conference yesterday attended a special service in Lincoln cathedral, where the Bishop of Lincoln and the Rev. Thomas Kirkup, secretary of the Wesleyan conference, both spoke upon the hope of the reunion of Christian churches.

### NEW ALIEN CODE IS TO BE DRAWN BY MR. JOHNSON

House Committee Head Says Registration Plan Is Not Espionage

By FREDERIC WILLIAM WILE SEATTLE, Wash., July 20-Albert Johnson (R.), Representative from Washington, and author of the "Immigration law," has summoned the House Immigration Committee to assemble at the Capital on Nov. 1 to lay the foundations of "the alien code," which will be submitted to the Sixty-Ninth Congress.

The "code" is to serve the pur-pose which its title indicates. Proceeding on the theory that the new law fixes American immigration policy with finality as far as the restrictive tenet is concerned, Mr. Johnson and his colleagues are now bent upon. "codification," of the law. It is desired to dispense with "the hodge-podge" of both the immigraon and naturalization statues by implifying them all along the line.

Mr. Johnson is under no illusions as to the difficulties in prospect. He knows these will be numerous. He doubts whether the proposed DES MOINES, Ia., July 20 (By the two years. The Washington legislator, however, is an avowed oppo-nent of the plan to dilute it with meter," attached to a speedometer "selective immigration." He has no of a car, has great possibilites in sympathy with the project to that helping statisticians forecast crop end which the National Association helping statisticians forecast crop of Manufacturers is sponsoring and acreages, Lacey F. Rickey of the will fight it to the end, if it reaches Bureau of Agricultural Economics, the stage of a congressional measure.

Question of Deportation Mr. Johnson says that the man-

ufacturers' association, in its anxiety for plenty of cheap labor om times, wholly ignores the fact olitical conditions in America.

"The association," says Mr. Johnson, "talks a lot about deporting radicals, but says nothing about deporting the hordes of laborers whom it would allow to enter the country when the demand for unskilled labor is brisk. The manufacturers propose to let them stay here when business is slack, to become a charge upon the community and a menace to our institutions. I am opposed to letting down the bars in that way. I am convinced Congress is opposed. It IN 'GAS' CONSUMPTION would undermine the whole fabric of the immigration policy, which has become an accepted part of the or-ganized law of the land."

time exporting \$160,000,000 worth of the American authorities all his immigration papers, without exception. When he has done so, he is virtually bereft of all official evidence of origin and identity.

"Prussianizing" Opposed

"We had to provide for this because of our experience with Chinese immigration, of trading documents for immigration smuggling purposes. When the alien, under the registration system, is provided a card, his identity is established for his own purposes as well as for those of the United States.

"It is not intended to Prussianize our country. Registration is not espionage. It is a mutual protective scheme, from which all parties con-cerned can only benefit, provided always that the alien is bona fide in his desire to become an assimilated element of the people among which he has come. It will facilitate (Continued on Page 2. Column 6)

nent. England derives about 12 per cent of her total revenue from her tariff, and the United States about 35 per cent, whereas China, in the last century, has been getting in-significant sums. For this reason she is obliged to retain the internal customs duty known as likin to the great detriment of the Chinese merchants.

Finally the present tariff tends to hamper industrial development at home and trade between nations. Generally speaking, a number of articles may be manufactured in China for local consumption. but China for local consumption, but owing to the extremely low tariff, foreign goods flood the chinese market and many young industries have little opportunity for development. Then, too, China's imports usually exceed exports, and she has steadily maintained an unfavorable balance of trade. The purchasing power of the people is forced down to the lowest limit and trade greatly handicapped.

The case against extraterritoriality as Dr. Ta Chen presented it to the Institute, had four main features as

Extraterritoriality is a derogation Extraterritoriality is a derogation of China's sovereign rights, and is considered by the Chinese people a great national humiliation. Much ill feeling between the foreigners and Chinese has its roots here.

The system gives rise to a multiplicity of courts in, one and the same locality. The interrelation of such courts perplexes both lawyers and laymen.

The law is uncertain for, as a

The law is uncertain for, as a rule, the law to be applied in a given case is the law of the defendant's nationality, and so in a commercial transaction between two individuals of two different nationalities, the rights and liabilities of the parties vary according to which party sues first.

As the consular officers by whom the law is chiefly administered are primarily chosen to protest the commercial interests of their own nationals, and as they are generally not trained judicial officials, the administration of justice is not always just.

just. Progress in Courts

When asked as to the condition of co-operation between boys and girls Chinese courts, and the chances for in maintaining order at the play-obtaining substantial justice if cases obtaining substantial justice if cases involving foreigners were brough West Side Park board, and to foster before them, Dr. Chen answered, "Frankly, China does not have a judicial system approximating that which exists in many western counsuperintendent of recreation centers, tries. But in recent years she has been making rapid progress in judicial reforms. She has completed the codification of the civil code, the criminal code, the civil procedure. ters of the centers by fostering a the criminal procedure, and the com mercial code. She has a national judicial system with the highest court the supreme court-in Peking.

"At present she has 39 model prisons, 44 high courts and procura tories, 38 branch high courts and 102 district courts. Up to 1923 there had been 57 important cases involving foreigners tried before Chinese courts. As far as the facts are known, there has been no complain

On the immigration issue, China is not pressing for change in the discrimination shown such Chinese as are already inside other countries. She claims treaty rights with the United States guaranteeing to such These educators are looking, also.

New Law Increases Limit to tionals of other countries. She will seek to have this institute bring to patriotism. An international committee will be seek to have this institute bring to public and official attention.

Branch advertising offices of the Monitor, where visitors are cordially welcomed, will be found at 2. Adelphi Terrace, London; in the Elysee Building, 56, Rue du Faubourg Saint Honore, Paris; and at 11, Via Magenta, Florence, Italy. in which these treaty promises are not being fulfilled.

"Put House in Order" What response the institute will make to the Chinese case as a whole it is still too early to predict. The general sympathy of the entire membership is clear, but it is not as clear that the institute will coincide with the Chinese suggestions as to how the ends sought should be achieved. In discussing both the tariff and the extraterritoriality issues, members from other countries have shown an inclination to insist that China must first put her own house in order before asking the nations of the west to relinquish privil-eges which they now hold.

This point of view is strongly re sented by many of the Chinese. Pointing to the abolition of extrater ritoriality in respect to Russians Germans, and persons of several other nationalities in China, they insist that the nations still holding this treaty right can afford to give and say that until it is given up there toward foreigners in China. plain that the major Chinese interest ing line of newly arrived allens. of this institute is to be extra errijust as the major Japanese interest will be immigration.

(Continued from Page 1)

sions during the last three years. I believe that if full consideration is given to the combined necessities of large storage for irrigation, for flood control, for the development o power and the supply of domestic water to the Los Angeles district the first step in the development of the Colorado River should be the construction of a high dam at either Boulder or Black Canyon, as the engineers might determine.

Other dams in the river, either above or below, would not be inter-fered with by such construction, if it is properly conceived. It is my view that the high dam is urgently needed now and for the next 25 years in order to accomplish the necessary ob-jectives at the earliest moment.

I had hoped that the Federal Gov-ernment would undertake or largely contribute to this development be cause it involves divergent interstate and different group interests covering storage, irrigation, power, municipal waters, and so forth, and will have so much human life dependent upon it that it should be directed by some authority in the interests of all.

The failure of the California Legislature to ratify the compact with the northern states with respect to water rights in the Colorado River will most probably delay the secur-ing of any authorization from Congress and consequently the develop ment of the many projects dependent on the river. I understand the northern states wholly reject the California propositions and will oppose in Co authorization until their water rights are protected. And in these times, when the eastern states are in no humor to tax themselves for reclamation and other works in the west which will increase agricultural production, the opposition coming out of the west through the north-ern basin states is likely to be very

damaging. To Remove Opposition

The sole object of the compact was to remove this opposition which has already prevented development during 10 years. One interesting phase of the three-years debate over the compact is that the justice of the proposed method of division of water between upper and lower basin states had not been criticized by the legislative action of any of the states except Arizona and even in that State a majority of the legislators have favored the principles involved in the compact.

ciples involved in the compac The California Legislature did not object to the plan of the compact, but disputes, both here and in other states, have arisen from the desire to settle other questions than the water right question alone. Many of these other questions are of the utmost importance, but my own feel ing always has been that we will probably get ahead faster if we got the quarrel with the northern states out of the way first.

In any event, the needs of the

New Bonds Are Guaranteed Against Depreciation-Interest Rate Cut

By Special Cable

PARIS, July 20-The great consolidating loan, by which it is hoped to begin to stabilize the franc, was launched today by Joseph Caillaux, the Finance Minister. It is perhaps the most important financial operation undertaken since the war, cause it is an effort to bring down the interest on loans from nearly the corment to carry out the Federation of British Industries proposal that a of British Industries proposal that a high rate, yet it met with only rela-

This year M. Caillaux boldly re-It is proposed that the Government duces the inducement, which constiassume what is called a catastrophe tutes a burden on the state, but or war risk-that is, risks which the cleverly endeavors to make the new ordinary actuarial computations of bonds desirable by guaranteeing It is recognized that the he will succeed in his purpose of facilitation of more exports is an gathering up floating national de-urgent problem, and exporters have fense bonds. Only holders of these been unable since the war to rely on bonds can subscribe for the new the former credit standing of their issue, but anybody can buy such bonds at the nearest post office.

Short-Term Bonds

It is true that on short-term bonds tion of the small individual risk on the interest is merely 5 per cent, but the real comparison is with the exfacturers to accept a large volume of isting 9 per cent loans because the export sales that are now refused present issue is not short term but because of credit doubt and the hesiup to the extent of 30,000,000,000 francs it will be a remarkable triumph and the complete financial restoration of France can safely be prophesied.

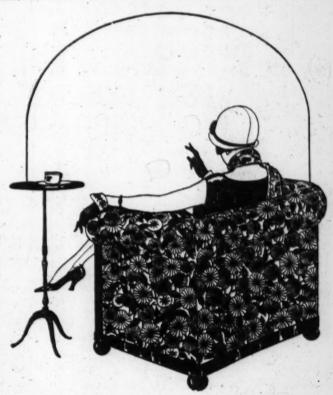

An encouraging circumstance is that, yesterday M. Caillaux was, with other ministers and members of his party, elected a general councillor (Special Correspondence)—Earle B. These elections went against the Mayfield (D.), Senator from Texas. Socialists and Communists and fawent against the has prepared for introduction at the vored the moderate Radicals, thus December session of Congress a bill confirming the Government in its reto repeal the provision of the Esch- liance on the Center.

Victory for M. Calllanx

But it is the personal victory of M. Caillaux that is timely and gives him additional prestige at the launching of the loan. He radiocast his speech describing the advan-tages of the issue. It is based on the dollar at 20 francs, or 1£ at 95. If the franc falls, the rate of interest will be correspondingly and au-tomatically increased to preserve it at the same value. But the Government does not mean to allow franc to slip, for this would involve larger Treasury payments. It is evident that the real plan

adumbrated by the loan is eventually to peg the franc at 20 to the dollar. Such, at least, will be the influence of today's significant loan issue.

RAILROAD EQUIPMENT OUTLOOK RAILROAD EQUIPMENT OUTLOOK
RAILROAD EQUIPMENT OUTLOOK
Railroad equipment manufacturers look
for a revival of business in September or
early October, expecting to enter 1926
with a comfortable volume of orders for
delivery that year. This summer has been
the industry's dullest season since 1914,
but the financial condition of the comparts have struck, asking an increase of 12.50 francs a week. The
employers are offering only 4.50
francs.

#### Government Reports on Employment and Trade Conditions for June

By the Associated Press Little change occurred in the industrial employment situation in New England during June, monthly report of the New England district United States Employment Service says. While part-time schedules continued in many industries the surplus of workers was taken care of at least in part in other lines. The building trades were reported active and the farm labor situation in general was satisfac-tory. The report by states follows:

Maine: There was no material change in the industrial employment during the past month. Part-time schedules continue in many of the industries and the depression in the shoe, textile, and woodworking industries contributes largely to the numbers unemployed. In some sections those temporarily released are able to find work in other lines, sufficient employment to absorb those released. Car repair shops con-tinue on a five-day week basis. ilding trades active with resident supply of men adequate for the demand. Farm labor situation throughout the State reported satisfactory.

Employment for Surplus New Hampshire: Part time schedules are in effect in many of the industries throughout the State. The surplus of workers in the shoe, textile and granito industries is being gradually cared for in other in-dustries. Overtime obtains in the resident supply ample for the demand. The supply and demand of farm labor throughout the State is

Vermont: There was a slight improvement noted in the industrial employment situatio: during June. While part-time operations continue in some of the industries, others have resumed full-time schedules, and unemployment has been materi-Overtime obtains in the machine shops and pulp mills in certain parts of the State. # "World's Greatest Buy"

# for the HUDSON COACH

Throughout Hudson's long-time policy of giving greatest value for the money, this is the lowest price, the finest Hudson, the greatest value Hudson ever offered. Only Hudson's exclusive advantages of the famous patented Super-Six principle combined with the world's largest production of 6-cylinder cars make it possible. By greater margins than ever before it is today the "World's Greatest Buy."

> The Greatest and Genuine Economy Its Owners Know

The good-will and satisfaction so evident throughout Hudson's enormous ownership results simply from the conviction of hundreds of thousands of individuals that they have the "World's Greatest Buy." The economy Hudson owners praise is not only in the big saving of first cost; they know, also, the greatest of all operating economies-faultless service for months-on end with farely any need whatever for attention and at a minimum expense for service.

After the judge had read his state ment, the case proceeded, the de-fense offering a certified copy of the Governor's message to the Legisla-ture approving the bill. The State to the introduction of the

Judge Raulston excluded the message. The defense also offered in evidence the textbook of biology adopted the state Book Commission. Arthur G. Hays of defense counsel read what this textbook says of Charles Darwin. Mr. Hays said the purpose of the defense was to show the public policy of the State. The State again objected. Judge Raulston ruled that the book might be filed

Controversy Over Testimony

A mild controversy, developed between defense and state counsel as to the presentation of natural science testimony. The question was as to whether the statements should be submitted without reading, or have portions read to the court

defense contended that it should be permitted to read these statements to the court in the hope that the court might be convinced of error in having held the law con-

The debate went back and forth for an hour, A. T. Stewart, Attorney-General, and W. J. Bryan for the State, and Dudley Field Malone, Mr. Hays and Clarence Darrow, for the

defense, taking part. Statements from eight natural scientists were offered to be placed in the record for submission to a higher court in the event Mr. Scopes is conicted of teaching evolution theories

Tennessee's Teaching Practice which any life existed up to the

he Scopes case. Mr. Nelson, who will become head University of Virginia and state geologist of Virginia in September, said that the study of buried animal and plant remains has been tought in Tennessee since 1828. He said in

Such teaching could not have been carried on through 97 years unless the teaching of evolution had been who formed this state

who formed this state.

In connection with evolution, it is especially of interest to note that the relative ages of the rocks correspond closely to the degrees of complexity of origin shown by the fossils in those rocks, the simpler organism being found in the more ancient rocks, each type of organism organism being found in the more ancient rocks, each type of organism becoming more and more complex as we come nearer the present day, man and his fossil, cultural remains, being no exception.

It therefore appears that it would be impossible to study or teach sectory in Tennessee or elsewhere without using the theory of evolution.

Tracing Geologie Periods in a statement which traced the

geologic periods, indicating the evolutionary evidences of each. Kirtley Mather, chairman of the department of geology at Harvard Univer-sity, declared "none of these facts is really in any way disturbing to the adherents to Christianity.'

Mr. Mather, who is a member of the Baptist Church at Newton Centre, Mass., and a teacher of a Sun-day school class, declared in part:

Not one of these facts contradicts any teaching of Jesus Christ known in me. None could for his teachings deal with moral law and spiritual realities. Natural science deals with physical laws and material results. When men are offered their choice between science, with its confident and unanimous acceptance of the evolutionary principle. and unanimous acceptance of the evolutionary principle on the one hand, and religion, with its necessary appeal to things unseen and unproven on the other, they are more likely to abandon religion than to abandon science.

If such a choice is forced upon us the churches will lose many of

If such a choice is forced upon us the churches will lose many of their best educated young people, the very ones upon whom they much depend for leadership in the coming years. Fortunately such a choice is absolutely unnecessary. To say that one must choose between evolution and Christianity is exactly like telling a child as he starts for school that he must choose between spelling and arithmetic.

Thorough knowledge of each is essential to success—both individual and racial—in life.

Although it is possible to construct a mechanistic evolutionary hypothesis which rules God out of the world, the theories of theistic evolution held by millions of scientifically trained Christian men and women lead inevitably to a better knowledge of God and a firmer faith in His effective presence in the world.

Discussing the two versions of the creation given in the first and second chapters of Genesis. Mr. Mather said:
There is an obvious lack of harmony between these two biblical accounts of creation so far as details of process and order of events are concerned. They are, however, in ferfect accord in presenting the spiritual truth that God is the author and the administrator of the universe.

The Bible doesn't state that the world was made about six thousand years ago. . Concerning the length of early history the Bible is absolutely silent. Natural science may conclude that the earth is a hundred million or a hundred billion years old, the conclusion does not

affect the Bible in the slightest de-

Evolution and Natural Selection Evolution, "the doctrine of how things have changed in the past and how they are changing in the pres-ent," was discussed by Dr. Winnerton C. Curiis, soologist, University of Missouri, in his statement. He said

The historical fact of evolution The historical fact of evolution seems attested by overwhelming evidence. The course pursued by evelution is known broadly in many instances, but in the nature of the case the evidence is limited and many of the steps will remain uncertain, without, however, a calling in question of the historic fact.

The causes of evolution present the most difficult problem of all and the one regarding which we know the least. Thence we turn to a discussion of Darwin's work, deciaring his accomplishment was two-

ng his accomplishment was two

In the first place he established organic evolution as the only rea-sonable explanation of the past his-tory of living things. Secondly, he offered in natural selection that which appeared an adequate ex-planation for the origin of species and hence for the causes of evolu-tion.

Continuing, Dr. Curtis went into a letailed discussion of the two accom plishments of the natural scientist claring that although theories of natural selection had suffered a decline within recent years, no other hypothesis of the causes of evoluion has completely replaced it, stating

As a result of this situation there has been much discussion among scientists regarding the adequacy of what is often referred to as the Darwinian theory, meaning natural selection. In condemning selection as an inadequate #x-planation of the problem, biologists have often seemed to condemn evolutions.

ution itself.

It is not strange that the layman, for whom Darwinism and
evolution are synonymous terms, believes that evolution has been re-jected when he hears that belief in Darwhilsm is on the wane. He does not understand that what is thus neant by Darwinism is not the his toric fact of evolution, but the pro-posed cause of evolution-natural

Investigations of Soil

statement admitted to the record. Agriculture and director of the New | well

A direct relation may be traced, said Dr. Lipman, "hetween soils, plants and animals in the evolution of organic life.

Among the early forms of life, he continued, there were bacteria capable of developing in a purely mineral n the public schools in violation of medium, such forms being found today in the sea, in mineral springs and in soils.

Some of them," said his prepared Tennessee is an ideal place in statement, "can obtain the energy which to study and learn the story for their life processes by oxidizing of rock layers which have been laid hydrogen gas, methane (marsh gas) down from the earliest times in carbon monoxide, sulphur, iron and even carbon.

"In the primitive seas, and on the state geologist of Tennessee, in a life prepared the way for the more statement admitted to the record of highly organized beings. Some bacteria are able to manufacture nitroger compounds out of the simple of the department of geology of the nitrogen gas of the air. They thus supply material out of which the protoplasm of plant and animal cells

gist of the University of Chicago, in his statement, declared, in-part, that | slack. the most satisfactory explanation of observed facts relating to the material universe, the world and all

"The field of the anthropologist is man, man's body and man's society, said Dr. Cole, "and in this way he finds himself working side by side with the biologist and geologist."

"Only a few points relating to man and his history have been reviewed, concluded the statement, "but enough has been said to indicate that the testimony of man's body, of his em-bryological life, of his fossil remains, strongly points to the fact that he is closely related to the other members of the animal world, and that his development to his present form has taken place through im-

mense periods of time. "It seems conclusive that it is impossible to teach anthropology or the pre-history of man without teaching

Evolution Called "Key" There is no degree of conflict between evolution and the Bible, Dr. Maynard M. Metcalf, zoologist, former head of the zoological department at Oberlin College, declared in his

The thing to do, he said, is not to attempt to guide God's self-revela-tion into channels "of our own ignorant choosing, but to seek his thought and himself in nature, his-tory and through his showing us his habit of producing results by gradual by evolution rather than by mmediate flat."

Evolution, he declared, not only has occurred but evidences of it ara visible today in both the plant and the animal world. Evolution is the only key found to the geographical distribution of animals and and to the differences noted between them, he asserted.

"Philosophy of Change" The evolutionist stands for and nelieves in a changing world, Dr. Ho-

### Two Exhibits Show Models and Paintings of Old Ships

Summer's Interest Is Foscused Upon Sturdy Maritime History of Massachusetts

seum announces that the exhibition in the Old State House, at the head of State Street, of ship models, pictures, etchings and other memorabilia relating to the U.S.S. Constitution and to the Donald McKay ships will remain open until Labor Day, from 9 a. m. to 4 p. m., excepting Sundays and holidays, in recognition of an unprecedented public interest and in order to give more people an oportunity to inspect these remind-

ers of a great maritime history. Simultaneously there has gone on view, at the Robert C. Vose galleries in Copley Square, an exhibition of old ship portraits, distinguished as a Non-Partisan Association at the collection for their qualities typical of such painting and for their remarkable stage of preservation. Pervading them is a palpable atmos-phere of pride which governed their authors as they painted for old ship masters who were doubly exacting because they knew every rope and holt in the ships used as subjects, and to whom any imaginative representative would be intolerable.

Approximately \$6000 has been al ready received at the State Street Trust Company by Allan Forbes, treasurer of the Donald McKay Memorial fund which was opened in the spring and still remains open for the purpose of erecting a public memorial o Donald McKay, the greatest clipper ship builder of his time, who helped those little ones from self to the about 100 per cent higher than in to secure peace between nations to lay the foundation of the maritime meaning of the true thanksgiving, pre-war times, and that no real must be used that has been employed history of the United States and that one child suggested, "Let's steady and profitable results will to secure peace between individuals, whose ships sailed the seven seas to whose ships sailed the seven seas to in knowledge of teknnical ship conpeace between cities, peace between bring back glory to the United States and to the genius who built

Thus has Boston three summer interests specifically focused upon the sturdy maritime chronicle of its est sym neighborhood, attesting to the ahid-life and history, the exact importance neighborhood, attesting to the anid-ing contemporary interest in days quately appraised. The pictures stand wherein beautiful ships sailed the as reminders of the cumulative progseven seas, exchanging their cargoes ress of the country, its commercial, for silks in China and India, spices material, even partially social progand rare woods from Java, jewels ress, for more than 300 years. and sandal, carven ivory and heaten stand for the realization of the dreams

No schoolboy but knows the thrilling history of the "Flying Cloud," the "Great Republic" and those other ships, numbered among the more than 100 that McKay built in his time, that rolled up unprecedented records for hazardous voyages, some of which were concerned in the great gold rush to California when miums were put upon shortening the voyage around the Horn in order that men might set about retrieving

The committee of the Marine Mu-eum announces that the exhibition cast with the fortunes of their companions in order to finance expedithe marine exhibition in the Old State House tells, by etching and painting, by lithograph and model.

Every collector knows the difficulty that exists nowadays in obtaining examples of original pictures that hung in the cabins of the old ship masters, or in the homes or countin rooms of the ships' owners. It was in the days of the old square riggers before photography had come into general use or had, perhaps, even been invented, that it was customacy for ship masters to commission artists, in the ports they visited, t record upon canvas the heloved spars and masts, the slender, heautiful bulls of their favorite ships

Paintings are Accurate No haphagard paintings of sailing vessels, just any sailing vessels, did these ship masters want, but accurate portraits which should identify the ships for all the world at a glance. If the scene were in port stilted in background and perhaps dull, what did it matter if only the beauty of the ship itself was faithfully recorded. Often the ship was painted in a setting which chronicled the surrounding circumstances of some dramatic incident in her career

The marine artists were skilled struction, and well they knew the importance of making no slip in spar or holt, in rigging or some lest, would approximate ship master, would profanation, be dire.

These pictures, then, are the strictof of a period in American silver from strange corners of the of young men, some of them scarcely more than boys, who sailed the seas in search of romance and adventure and returned with the record of a ommercial trade established as wel

#### PREDICTS RIGID ENFORCEMENT

Anti-Saloon League Head Noncommittal on Second District Candidates

WESTFIELD, Mass., July 20 (Special)-So far as the second congressional district contest is concerned, the Anti-Saloon League has not indorsed any of the candidates, William-M. Forgrave, superintendent of the State Anti-Saloon League, said in his address on "Prohibition Enforce-ment in Massachusetts," in the Methodist Church yesterday. liam H. Feiker, Mayor of Northamp ton, a candidate, was an interested listener to Mr. Forgrave's address and afterward conferred with the prohibition enforcement worker. He declared that regardless of previous personal convictions concerning prohibition, the law is now on the statute books and should be enforced.

Mayor Feiker said he was opposed to any modification of the law to provide light wines and beer, believing this would destroy the effectiveness of the act and provide a loophole for the return of harder liquors. He concluded by declaring that he had issued orders to his police depart-ment to have the law enforced, and so long as he was at the head of the city government and the law was on books, he would see to it that it

Mr. Forgrave, in discussing the candidates in the congressional race. Henry L. Bowles, of Springfield, is not the Administration candidate. The position of Roland D. Sawyer, of Ware is known." In regard to Mayor Feiker, Forgrave was noncommittal. The league has not reached a dethe candidates, he said.

In his address Mr. Forgrave said he felt that with the new prohibition en-forcement department in power a more rigid enforcement of prohibition will follow and that activity at sea would be transferred to land with equal effectiveness.

"However," he added, "communities must not expect federal forces to do the backdoor work of the local police. It is the duty of each law abiding community to make its fficials understand that they want enforcement of the law, and if the law is not enforced, then it is, beause the community is not in favor of law enforcement.

"The main trouble with the enforcement of the law is not with the police, but with the kind-hearted, sympathetic judiclary. The woodshed methods so well remembered in the life of almost every youth should Lillian B. Messer and Ruth Hallock Frederick Mulhaupt, J. William Foshe applied to the breakers of liquor form a veritable bouquet of beauty.

forced in Massachusetts today, but conditions have been much im-proved. Rum row has practically disappeared. The jall population has shown a decided decrease. Jalis in Ipswich and Lowell have been closed and converted into schoolhouses. There is not a single state-ment based on logic that can be turned to a wet argument on the comparison of conditions existing during the prohibition period and a similar period during the wet régime, if the truth is told."

#### The North Shore Arts Association

Gloucester, July 17 Special Correspondence
HE third annual exhibition of the North Shore Arts Association is in full swing in its galleries in Gloucester, Mass. Undoubtedly it is a summer exhibition of American art that has no equal. Good judgment has been exercised in hanging the 384 works, among which land-scapes predominate though a number of important figure compositions are included.

Outstanding among the figure subjects are Lucy Taggert's "Carnival," Mary F. B. Clay's "Betsy," Carl Nor-del's "The Listeners," Gertrude Fiske's "Charlotte in Gray." Orlando Rouland shows a distinguished portrait, and William M. Paxton ends a characteristic portrait of Charles Bittinger, the artist. Camelia Whitehurst's "Eliza Anne" is full of the charm of childhood.

The harbor scenes of Frederick Mulhaupt, Bertha Menzler Peyton, Lester W. Stevens, Felicie Waldo Howell and Morris Hall Pancoast are all noteworthy for color or ani-H. Woodbury, Frederick J. Addition of Veteran Quinn Has Steadying Effect on Whole Pitching Staff

AMERICAN LEAGUE

RESULS SATURDAY Chicago 10, Boston 2. Washington 19, Cleveland 6, Detroit 7, New York 3. St. Louis 6, Philadelphia 2. RESULTS SUNDAY

niladelphia 12, St. Louis 8 (15 in Ings). ashington 4, Cleveland 2, troit 18, New York 12, ston at Chicago, rain. GAMES TODAY Roston at Chicago (2 games). New York at Detroit. Washington at Cleveland. Philadelphia at St. Louis.

The Philadelphia Athletics, today, look more formidable than ever to the World Champion Washington Senators, due largely to the strategical move on the part of Manager Connie Mack when he secured Pitcher J. J. Quinn from the Boston Red Sox about a week and a half ago. It is remarkable what a change the acquisition of one player can make in equisition of one player can make in the outlook of a team and yet, with he veteran Quinn on the roster, the Athletics can look into the future with much more assurance than they could two weeks ago when they were in the midst of a bad slump which many fans believed would leave them n the second division as was the case a year ago, Quinn has won two well-pitched games for the present leaders in his only two starts for

Race Not Open One

The league race is no longer open to all. The Senators and the Athletics appear to be in a class by themselves and are setting a pace that leaves little doubt among baseball fans that either circles appear to be in a class by themselves and are setting a pace that leaves little doubt among baseball fans that either one or the other will win the pennant. St. Louis and Detroit are close enough to Chicago in third place to wrest that position away at any-time, while Cleveland and New York continue their struggle for possession of while Cleveland and New York continue their struggle for possession of state of the amateur status of Murchison had the amateur status of Murchison had winning nine and dividing the pole type had to chicago in third place to wrest that position away at any-time, while Cleveland and New York continue their struggle for possession of state of the amateur status of Murchison had winning nine and dividing the pole type had to chicago in third place to wrest that position away at any-time, while Cleveland and New York continue their struggle for possession of state of the continue their struggle for possession of the amateur status of Murchison had the amateur status of Murchison had yault with their American rivals.

while Cleveland and New York continue their struggle for possession of sixth place. Boston has won less than half as many games as the leaders and lost twice as many and will probably finish in eighth place where it has been questioned. Nothing new in the case developed over the week-end, but Sir Montagu Shearman, president of the British Amateur Athletic Association, authorized the following state-nearly all the season. The season is how more than half completed and, although there is little likelihood of any other club putting Washington or Philadelphia out of the running, the race between these two teams for the pennant should be interesting all the way.

St. Louis is at present in one of its frequent winning streaks, having won six games and lost one during the pass week. Even the Athletics were unable to stop the Browns last Saturday, but yesterday, stopped them by winning an uphill struggle in the twelfth inning when they scored four runs, Philadelphia, last week, won seven and lost only one, passing the Senators in the league standing as the champions won only three and lost four. It is the first time slince the early season that Washington has failed to win a majority of its games during the week's play.

Philadelphia has frequently lost more its games during the week's play. Philadelphia has frequently lost more than it has won in one week however, but has recovered with great rapidity by winning nearly all its games in the following week.

Title at Longwood word with ease in the following week's play. Patterson Wins the Single's out the changes which featured every outer the changes which featured every other event. The defeat of the Americans was overwhelming. Lowe walked in in the half-mile and mile, while Stevenson won with ease in the quarter. In four

Detroit Wins Four

ish, as the winner had been down nearly all the way and came from be-hind with a brand of golf that was hard to beat, to wipe out Martin's lead at the thirty-first hole and then win the next three holes and the laurels by coring par on all of them. Turning into the home stretch, Car-

Turning into the home stretch, Carter seemed to foresee victory, while Martin, after hanging onto his one-hole lead for three holes by halving two of them in par and the other with a birdle, began to slip. He took one above par on each of the next four holes, while Carter kept up his perfect golf and was even with perfect figures for 16 holes played in the afternoon, as against Martin's 7 over. During the double round Carter perfect golf and was even with perfect figures for 16 holes played in the afternoon, as against Martin's 7 over. During the double round Carter made six birdies, three in each round, while Martin captured only three. Carter had only two holes in 6, and one of these he might have made in less if he had not picked up from a trap. Carter scored par on 15 holes, while Martin shot perfectly on 19 holes. Martin had seven straight pars from the eighteenth to the twenty-fourth hole, but Carter was also playing well at that stretch of the journey, so that he lost three of these holes and did not win any of them.

Maybe that affected Martin, for he never did so well afterward, getting only two pars and the carter was also playing pitcher of the Mint league, has been sold to the New York Americans.

#### GERMAN BOARD TO INVESTIGATE

Will Take Up Excessive Expense Charges

BERLIN, July 20 (P)—The German Amateur Athletic Board is investigating charges that the United States runners, Loren Murchison of Newark, N. J., and C. W. Paddolck of of California, received money from sports promoters during their recent participation in German races.

The German sporting authorities will postpone action until the amateur athletic unions of the United States and of England have passed upon the charges which have been made in Berlin newspapers. As a result of this challenging of the Americans' amateur status, medals won by Murchison Saturday at Stamford Bridge, England, have been withheld.

The German Amateur Athletic Board has requested vouchers from German sports promoters' who say they paid "fees and expenses" to Murchison and Paddock. German newspaper critics say the Americans were "anything but modest" in their financial requests. Newspapers say

were "anything but modest" in their financial requests. Newspapers say both Americans received at Hamburg "start money" for two races, but ap-peared in only one race each. Criticism also appears in the Berlin press at the heralding of the American run-ners as being merely on an "exhibi-Berlin sporting editors declare flatly

the Americans were not giving "ex-hibitions" in the amateur sense of the word because of the "fees and expenses" they received in Germany. These charges in Berlin news papers were sent to London by air post Friday and it is understood here that they were the basis for the English action in withholding the medals won by Murchison at the Stamford Bridge meet Saturday.

STOCKHOLM, July 20 (A)—Swedish sports promoters responsible for the recent visit here of C. W. Paddock, United States runner, are disinclined to The pitching staff of the Athletics has been composed of men with little or no experience in the major leagues; but Quinn has given and should give the necessary degree of steadiness to the staff as a whole which should go far toward bringing a pennant to Philadelphia. Washington has proved the value of veteran pitching in this season of heavy hitting.

Race Not Open Degree of the charges in Berlin newsparons and Loren Murchison, his companion American sprinter, have made excessive demands for expenses in Stockholm." one of the local promoters said, "were certainly not low, as such items go; but they were not excessive. When the Stockholm athletic meeting at which Paddock appeared proved a financial failure, the accept the charges in Berlin newspapers that he and Loren Murchison, his Easy Victory for his expense account."
Paddock is now in Finland but is

expected to return to Sweden next

and are qualified to meet the victors in
the play in the American zone. In the
first match Saturday, Lacoste defeated
H. Timmer of Holland, 5—7, 7—5, 6—2,
6—2. In the second match Jean Borotra
defeated Kool, 6—2, 6—4, 10—8.

LEHIGH VALLEY EARNINGS Surplus after charges of Lehigh Valley Railroad for the first five months of 1925 approximated \$3,325,000, equal to \$2.75 a share on 1,210,034 shares (\$50 par outstanding). In the first six months of 1924, in two months of which the road received income from Lehigh Valley Coal, surplus was \$3,118,363, or \$2.58 a share. On a seasonal basis these earnings indicate \$8 a share annully, ginst \$5,06 in 1924.

PORTLAND, Ore., July 20 (2)—President T. L. Turner, of the Portland Baseball Club of the Pacific Coast League, announced Saturday that he had sent Pitcher David Keefe to the Waterbury, Conn., club of the Eastern League on an optional agreement.

#### LEADERS KEEP UP EVEN PACE

More Like Champions in

place and the latter in third. The superior pitching of the Reds may be the deciding factor in favor of the team, although the Cardinals have had steady pitching coupled with fine 6-3.

last three clubs in the standing are in tically only a question of which can win sixth place. The surprising part 6-8, 6-4. Miss Mary Atkin, Chicago, defeated with sixth place. The surprising part 6-8, 6-4.

it all is that the Braves look more like a last-place team when they are playing second division clubs. The Braves have won seven games from New York, eight from Brooklyn and five from Pittsburgh, but against five from Pittsburgh, but against Philadelphia they have won only three; against Cincinnati, two, and against St. Louis and Chicago, five. Phila-St. Louis and Chicago, five. Philadelphia, in sixth place, has won 12 games from the Braves, or nearly twice the number won by the Giants against Boston. The Braves are only \$1\frac{1}{2}\$ games behind Cincinnati, in third place. This means that the entire standing of the league from third place down can easily undergo a radical change within a short period by a sudden show of strength from the lower clubs.

New York, created a new national W. T. Tilden 2d, and A. L. Wiener, mark for the 300-meter breast stroke champion as the mark for the 300-meter stroke champion and mark for the 300-meter stroke champion was wis place. This means that the entire standing of the league from third place down can easily undergo a radical change within a short period by a sudden show of strength from the lower clubs.

Boston and St. Louis won three and American breast stroke champion was

Boston and St. Louis won three and lost four games last week while Brooklyn had the worst record of the week with two victories and five defeats. Cincinnati's rise from, fifth place to third was the biggest change in the tanding from a week ago. Brooklyn ropped from third to fourth place and St. Louis dropped from the fourth to fifth. Philadelphia, Chicago and Bos-ton maintained their present stand-ings of sixth, seventh and eighth, re-

#### THREE WOMEN'S MARKS ON TRACK ARE BROKEN

SAN FRANCISCO, July 20 (A) Three women's world's track records were broken Saturday, including a new mark in the broad jump set by Miss Helen Filkey, versatile Chicago star, in the national track meet for women in Kezar Memorial Stadium here. Miss Filkey leaped 17ft. 1/4 in. The former 220-yard dash time was eclipsed when Miss Elizabeth Nelson Pasadena covered the stretch in

A third mark to fall was the 440-A third mark to fall was the 440-yard relay, a picked team consisting of Helen Filkey: Miss Alta Cart-wright, Eureka, Calif.; Miss Maybelle Gilliland, New York, and Miss Frances Rupport, Philadelphia, negotiated the distance in 51 2-5s. Miss Fikey proved to be idual star of the meet, tak

firsts, the 100-yard dash, 60-yard hur-dles and broad jump. She ran anchor on the winning relay team. Her time in the century was 11 3-5e., while she cleared the hurdles in the fast time of 8 2-5s. A toss of 23ft. 7in. won first place in the baseball throw for Ann Harrington of Eureka.

Another star of the meet was Miss Alta Cartwright, whose two firsts and a second place brought her to within striking distance of Miss Filkey. The Eureka girl won the 60 and 75-yard sprints, placed second in the broad jump and ran on the winning relay team.

DE PALMA WINS RACE DE PALMA WINS BAUE
DENVER, July 20 (P)—Ralph De
Palma won the 100-mile sutomobile race
here Saturday which ended a two-day

Let me therefore transport the reader to the Swedish Partition. The huilding con-Swedish Payilion. The building consists of three parts—a garden, a small tower which also constitutes the entrance, and a large high-roofed hall. With admirable restraint the Swedes have not found it necessary to cram their official pavilion with every conceivable Swedish product, but they have confined themselves to but they have confined themselves to showing something which is modern and characteristic of their country. They have in fact considered the general public, which knows little or nothing of Swedish affairs.

Maps in Series The entrance vestibule is a small but high room and its walls are decorated with a series of vigorously painted maps of Sweden, each of which shows the main centers of her industrial undertakings and in fact supplies the visitor in a decorative form with information which he needs to picture the activities of the coun-

The large adjoining room is made effective not only by the simplicity of its well-constructed proportions, but also because there is so little in the room that one is bound to take in the objects which are there.

little too ornately, engraved, is the ping. only evidence of the very important. Th industrial section of the Grand Palais. There are also very few pieces of furniture which show us at once that fine modern furniture in Sweden means inlaid furniture, generally in natural colored woods, and the con-servative visitors will hear with relief that as far as the forms of the furniture are concerned there is little innovation. One piece reminds us of a Viking ship, and the cabinet ex-hibited is a refined specimen of the peasant-built furniture whose design has not varied for many a genera-

The floor and the walls reveal a few hand-made carpets, the charac-teristics of which we will examine in greater detail now, for our journey takes us to the two large rooms on the of these rooms is given up to textiles The carpets exhibited there show very little modern design. They are adaptations and nevertheless they do not possess the evil brand of borrowed blumes. The patterns are the simple "lightning" patterns or the geometric designs familiar chiefly in Caucasian and Anatolian rugs. The designs have been simplified and only the main patterns have survived their adoption in Sweden, that is to say all the small floral decoration with which the Oriental products teem has been eliminated.

The Color Scheme

What is entirely Swedish, however, is the color scheme. I do not know Swedish art well enough to say whether their color schemes are very modern in this country, but I should say not; at any rate the colors are good vegetable dyes and they give one the impression that the modern designer and manufacturer of textiles of this kind is duly inspired by a healthy respect for the great achievement of the past which has given us patterns and colors rarely rivaled today. How-ever, Swedes will be Swedes, and modern ones at that, and thus they make their contribution to the modern movement. It does not strike the pre-eminent note in their textile exhibition and can therefore be disregarded here.

A notable feature of this section, however, is the series of hand-woven woolen materials in which their traditional interest in gros-point and cross-stitch patterns is point and cross-stitch patterns is evident. Strange to say, the majority of the embroidery exhibits are bad. Poor designs and coloring and an impeachable quality of workmanship, as well as sentimental subjects, characterize the specimens, but the general excellence of the textiles compels us to believe that these embroideries are believe that these embroideries are

the exception which proves the rule.

The adjoining room is filled chiefly with glass and porcelain, and a few cases are devoted to gold and silver work, and two cabinets contain books. The metal work is poor, and when one thinks of the admirable silver-work of the Swedes of earlier generations, one can only hope that their modern silversmiths will stand in penitent admiration before the work of their

In great contrast, the book production is admirable and modern There does not seem to have been a typographical tradition in Sweden at all. I am right in saying, I believe, that there is only one type in existence which is of truly Swedish

Germany and England are very restricted in number. The Swedish Then comes the section, housed in the type and comes the section, housed in the type and the typ firms have shown their products at and well executed, depending for their own expense; and since the actual their inspiration on German or

together.

The Swedes, who have overcome which have a northern flavor about people, scrupulously clean, open-handed and courteous, and when we look at the glass which they set in such profusion on their hospitable tables we suspect an element of graceful refinement that is perhaps surprising in so robust and hail-fellow-well-met a nation. It would be easy to spoil praise by

the superabundance of superlatives in the matter of their glass, for its virtues are many. Not least of these is the fact that their glass is exceedingly moderate in price. The shapes of the goblets, bottles, jugs, dishes and ornamental glassware are usually elegant without being in any way flimsy. Most of the pieces, even those whose purpose is chiefly decorative, do not suffer from the comon defect of being useless, that is to say their goblets for example are primarily goblets, skillfully cut pieces of glass whose function is to strong and one in which the weak contain some liquid which can be succumb partaken easily from it. ### Did You Ever Fall In Love With Words?

world offers vast opportunities to the skillful users of them. There are words for every occasion-words that thunder commands; words bristling with compelling force; words of zephyr-like delicacy; words which convey inspired thought; words of romance; words to express every shade of meaning.

Through a justly famous easy method of spare time study at home you may make words the expressions of your moods, the tools of your necessities. You can learn how to weave them into stories that sell; advertisements that convince; letters that win.

GET THE FREE BOOKLET "How to Become a Master of English" fells you all about the Kleiser Practical English Course which is endorsed by famous writers as Booth Tarkington, Irvin K. Cobb, Mary Roberts Rinehart. Ask for it on a postal card, or write your name in margin and return this advertisement, and the book will come to you by mail, free of charge. No agents will call.

Funk & Wagnalls Co., Dept. 859, N. Y.

Woodstock Art Exhibition

Woodstock, N. Y. | can hang together on the gallery wall with pleasing result. A Birge Harrison snow scene is MBERS of the Woodstock flanked by two portraits of the mod-Art Association have assembled a serious and prolific ern school, by Austin Mecklem and

exhibition of paintings mostly done Arnold Wiltz, respectively. By way at the Catskill mountain colony, in the second general exhibition offered at the local gallery. It is a much rough walnut wood carving by War-ren Wheelock, and a stone "Mother and Child" by Myra Mussleman-Carr, that stand alongside. The general juggling for harmony is also carried out on another wall, where a "Madonna Lily," by W. E. Schu-macher, in heavy blue is centered between a figure of "Christ" by Warren Wheelock and a unique 'Mother and Child" by T. Watanabe,

carved from coal.

Self-portraits of interest are by Henry Mattson and Ernest Fiene. Judson Smith shows several still lifes. M. Mayer is a new exhibitor with a landscape from the conservative school, a picture that offers more ready charms than the ultramodern presentations. A somewhat sensational portrait of "Mother" by Stan is devoid of the accepted artifices of the portrait painter's conformity.

H. E. Kleinert, with an engaging portrait, wins a first place in the show. John Carroll returns from France with a more modern paint ing. "Montemarte," a newer school. picture that oddly enough becomes intriguing from a close-up view. Rudolph Tandler shows a large portrait of Eugene Haile, composer, that has exceptional local interest.

There are a great many artists represented. The students at the Catskill Mountain colony are less plentiful this season, and the work of the association enlists many painters who have left the experimental stage. While the show naturally must include student work to be representative of the colony, and can therefore not hope to rank with a National Academy exhibition, yet it had been sponsored by many serious workers who reside at the colony during the summer months. Other exhibitors are Carl Eric Linden, Otto Bierhals, Arnold Blanch, Alfred Hutty, Richard Lahey, Hermon More, Charles Bateman, Konrad Cramer, Cecile Barrere, E. B. Winslow, Mary D. Smith, E. Made-line Shiff, Pamela Bianco, George Klitgard, Pamela Vinton - Brown, Pieter Mijer, Harry Gottlieb, Paul Rohland, Edgar, M. Ward, Harry Tedlie, Marion A. White and Robert W. Chanler. ciation gained no little attention

#### The Honor System and Its Practical Reality in College

By HENRY LOUIS SMITH

CUCH words as religion, democ racy, liberty, honor, chivalry, etc., are incapable of exact definition or delimitation. So with that form of self-discipline and idealism known as the student "honorsystem." No two campus groups pro fessing to practice it accept the same code of honor or agree as to the ex act function and limitations of the "system." In many institutions it is no more than a traditional "verbal asset," sometimes the present empty husk of a past reality. In its appli-cation to student conduct it is often fantastically narrow and one-sided, like the chivalry of the Middle Ages. It is also sometimes unfortunately harsh in its treatment of individual cases. To many outsiders, it seems, like religion, idealism, and the Golden Rule, too vague, illogical, and sentimental to be a really workable program with human nature as it is.

Yet a lifetime of practical experi-ence with the "honor system" convinces me that of all the character-building agencies of the American college campus it may become, if effectively utilized, by far the most valuable and efficient.

Its Definition

Merely abstaining from faculty supervision, "trusting" everybody and "putting every student on his honor," whether he has any or not, is as far from the honor-system as an-archy is from ordered liberty.

The "honor-system" is a form of student self-government which, as-

suming that every student is a man of absolute truthfulness and honesty, takes immediate cognizance of all violations of an accepted code of honor; and through student organizations procures the permanent removal from the student-body of all those who, by violating in any degree this accepted code, prove that they cannot thus be safely trusted.

That the honor system may be a working reality and not, as it so often is, a mere pretense, at least

be organized to enforce it, and must accept, willingly and courageously, the faculty, while reserving its ultistudent, but to the organized, sympathetic, and willing student body.

To observe the daily life of a group of Christians gives one a better idea

Why should we exact unintelligent obedience from our children? We may have the child's best interest at heart when we tell him to put on his mitshould do so, unthinkingly, like an automaton. "My hands are really not

is not on impertinent remark. Children have the same right as have adults to learn by experience; and providing the experience will not be too drastic, we ought to let them learn their lessons. If John's hands get very cold, because he has not heeded mother's advice, the next cold day, he will gladly comply with her suggestion. Of course, the less unis therefore entitled to a respectful reasoning obedience we demand, the more likely will our children be to unkind, to say the least. Many of take our advice, even when they do us look upon our views of last year not agree with it, because they have as being very "half-baked," and yet; found by experience that "mother-knows best." But we parents must always bear in mind that our children are thinking individuals, not animals or machines.

as being very "half-baked," and yet, as long as he wishes. This goes on at the time, we would have been day and night the whole session, the only guardian of these thousands of made fun of them.

That idea of Johnny's about erganizing a band seems rather for and habits of the honor system.

**Equal Courtesy** Rarely do we see an adult accord a child the same courtesy that he does a grown-up and seldom do parents grant their children the same courteous treatment that they exact from them. A little girl said to her friend in wonderment, "Why, your mother treats you like a stranger. She talks to you so nice and says 'Please,' and everything." Even worse than discourtesy is the habit of "talking down" to children, in which many grown-ups indulge, a practice which children deeply resent. We need to become more simple and childlike, in order to meet our little treatment.

ones on their own level. Children differ very greatly in their interests and talents, and because we have always wanted a musician in the family is no guarantee that we shall have one. If Mary shows little shall have one. If Mary shows little fondness for music, after we have given her every opportunity to develop the same, we ought certainly to allow her to devote her time to drawing and painting, which she dearly Streatham, London, S. # THE HOME FORUM

#### On the Building of Houses

T WAS once pointed out to me by an architect, a recognized authority in his profession, that the the history of religion, and, more dividual, and in this he sounded a particularly, identified with sacrifi- deep and fundamental note in human cial fires. It was required that the sacred fire should be kept perpetually burning; this necessitated the adoption of means for protecting it press their highest conceptions of from wind and storm; thus came beauty and usefulness, and we see into being the four walls, made of this manifested in beautiful houses common clay. A roof with a hole in into which they have brought those it naturally developed. From such higher qualities that make a house humble beginnings and utilitarian causes, was developed the whole history all whose highest desire is to extory of architecture

With its roots in the primeval soil rich in spiritual meaning. of a high aspiration and a spiritual obligation, the house becomes a subfellow's exclamation

"Ah to build-to build! This is the noblest of the arts,"

compels lively activity of thought processes. But the more considera-tion we give to the subject of house building, the closer we get to the idea of poetry in bricks and mortar, lence of the motivating idea will be the degree of beauty and utility of the house, whether it be the house of a laborer, or the "house of God." Even the long serried ranks of untractive villas of a London suburb, express a dominant thought,-economy in construction cost, on a quantity basis. Such buildings are often without character or individuality, of course, and to that extent they are indicative of a fault in the plan of modern civilization, Ruskin was right when he said, "Better the rudest work that tells a story and records a fact, than the richest with-out meaning." The houses built on a quantity basis according to one uniform plan, may tell a story, but it is not an autobiography.

It cannot be said of many modern houses, that they are like the human beings that inhabit them. To quote Ruskin again, "I would have, architect must be a great sculptor then, our ordinary dwelling houses or painter, otherwise he is only a built to last, and built to be lovely; builder. We cannot all be architects. as rich and full of pleasantness as of course, but we may all see beauty may be, within and without, with such in stones. Every beautiful building differences as may suit and express has, of course, been a complete idea each man's character and occupa-tion, and partly, his history." This is certainly pleasant to contemplate.

It reminds one of certain old English homesteads, built during the Renaissance, or earlier, and added to by successive generations of the descendants of the original owners, each expressing the spirit of the which they lived, with the result that many of these ancient dwellings are polyglots, talking in four or five different styles of architecture, and suggesting as many impressions of the successive generations who were occupants. But this,

In Revised Braille, Grade One and a Half
Five Volumes......\$12.50 FRENCH TRANSLATION Alternate pages of English and French

GERMAN TRANSLATION Alternate pages of English and German

Where no Christian Science Reading Room is available the book will be sent at the above prices, express or postage prepaid, on either domestic or foreign shipments.

The other works of Mrs. Eddy may also be read or purchased at Christian Science Reading Rooms, or a complete list with descriptions and prices will be sent upon application.

Remittance by money order or by draft on New York or Boston should accompany all orders and be made payable to

HARRY I. HUNT, Publishers' Agent 107 Falmouth St., Back Bay Station BOSTON, U. S. A.

# STOCK PRICES FORCE THEIR

Sporadic profit-taking failed to check the market's ubward trend and vigorous buying operations continued in many parts of the list throughout the forenoon. With railroads approaching a period of normally heavy traffic, following record-breaking car loadings in the first half of the year, accumulation of standard dividend-paying issues such as Atchison, New York Central and Baltimore & Ohio was renewed, 'lifting prices a point or so. Revivai of merger talks accounted for rallies in Wheeling and Lake Erle preferred, which jumped almost three points before noon, and in Rock Island, which 'advanced 12's.

Plant expansions by several motor companies coincident with the introduction of new models and announcement of higher tire prices, contributed to the strength of the motor, accessory and tire stocks. Mack Trucks crossed 190 to a record high price and moderate gains were registered by Stewart-Warner, United States Rubber, Hayes Wheel and Motor Wheel.

Sears Roebuck, with a 4½ point gain, topped the list of new high records which included Havana Electric, Public Service of New Jersey preferred, and Fairbanks-Morse. United States Steel and American Can receded fractionally from their early highs.

Call money renewed at 3% per cent.

Prompt oversubscription of the \$75.000,000 Australian loan, offered today
by J. P. Morgan & Co., and the continuance of the easy money rates imparted a firm tone to today's bond
trading.

An unusually wide inquiry for the
Australian bonds was reported from all

28,

An unusually wide inquiry for the Australian bonds was reported from all parts of the country, and Wall Street's interest in the offerings diverted attention from bond dealings on the stock exchange.

No striking price changes were evident during the forenoon, but a moderate demand developed for some of the high-grade railroad liens, in line with the stronger showing of these shares, and some of the standard public utilities; such as American Telephone 5½s, Pan-American, Skelly and other convertible oil liens lost ground on profittaking.

EXPORTS OF MOTOR VEHICLES EXPAND

Attainment of New Record · Is Possibility

18114 4212 24%

4414

Exports of automobiles, motor trucks, parts and accessories show remarkable expansion. If the present rate is continued for the year a new record will be established.

In five months of 1925 the value of these exports was 68 2-3 per cent of the total for 1924, with motor cycles, service appliances, gasoline marine engines, aircraft and motor boats included. The value of shipments by months follows:

January, \$19,776,349; February, \$19,-289,224; March, \$32,645,817; April, \$28,858,42; May, \$24,518,529, Text laws.

In the month and part of the company of the company

The British pig iron output in June fell to \$10,300 tons from \$54,700 tons in May and \$67,000 in June at year. The steel output was \$55,400 tons compared with \$51,500 in May and \$651,500 in June, 1924.

# NEW YORK CURB

WHITE EAGLE OIL'S INCOME White Eagle Oil & Refining increased its net income in the first half of 1925 to \$1,814,949 in comparison with \$1,618,967 in the corresponding period last year.

EATON AXLE EARNINGS the current year, after all charges ex-cept federal taxes, were \$405,579.

TIRE PRICES ADVANCE Kisk Rubber Company has advanced prices of tubes and casings 10 to 15 per cent.

Aiomite Corporation, with capitalization of \$6,300.000, has been formed to take over and develop a deposit of diatomaccous earth near Terre Bonne. Ore. The corporation, which is headed by eastern financiers, plans immediate construction of railroad trackage and brick kilns to cost more than \$500,000.

### CONTINENTAL CAN HAS GOOD RECORD

Profits Rising—May Earn \$9 Share on Common

The advance in Continental Can The advance in Continental Can common to above 70 is a belated recognition that the stock has been selling out of line with the general industrial market. Continental Can pays \$4 a share annually, yielding 5.70 per cent at 70. But for the last two years it has declared extra dividends of 5 per cent each in stock at the January meetings so that the actual yield has been over 10 per cent.

It is doubtful whether directors will continue the payment of annual stock

continue the payment of annual stock dividends. Probabilities favor the declaration of a cash extra instead, next January.

next January.

Current estimates, based on the showing the first half of the year, place 1925 net for stock at fully \$4,053,325 in 1924. Preferred dividend requirements are approximately \$400,000, leaving for the common, on the basis of this estimate, \$4,100,000, or \$9 a share on 450,050 shares outstanding. Continental Can has a history of

Continental Can has a history of consistently increasing profits. Except for 1920 and 1921, when large sales by the Government of surplus canned goods hit the entire packing and can-making industries earnings have goods hit the entire packing and can-making industries, earnings have shown steady gain from year to year. And even in 1921, the worst year, Con-tinental Can more than earned the preferred dividend.

The accompanying table shows Con-tinental Can's net for the stock since incorporation:

| Incorporation | 1925 (est) | 1925 (est) | 1925 (est) | 1924 (4.053,325 1917 3.280,977 1923 3.767,730 1916 2.143,554 1922 3.161,693 1915 1.325,839 1920 \$1,548,620 1913 788,016 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963 | 1919 2.624,963

Consumption of tin cans has grown from around 1,000,000,000 units arry in the century to 8,000,000,000 units are arry in the century to 8,000,000,000 today, and is still steadily increasing.

# SLOSS-SHEFFIELD

one of the lowest cost iron producers in the United States.

Working capital as of Dec. 31 last was \$4.807.711, an increase of \$1.636, 485 over a year before. An additional gain has undoubtedly been made in working capital since December.

The company is strong in cash, having a balance of \$1.986.315 at the close of 1924, compared with \$833.019 a year before and \$659.794 at the end of 1923. Sloss has frequently been mentioned as a candidate in iron and steel merger proposals, but it is unlikely to consolidate for some time at least.

Outlook the balance of the year is favorable. With prospect of increased business the company may show in excess of \$12 a common share for \$1.925.

NEW ENGLAND TELEPHONE New England Telephone & Telegraph Cocpany reports for the five months ended May 31 net income available for dividends of \$1,011,403. This is equal to \$1.21 a share on the \$83,025,400 stock.

Professor Irving Fisher's wholesale price index of 200 representative commodities and the relative purchasing power of money for the last four weeks, compared with the previous month's average, the low of January, 1922, the previous year's average, the 1925 high and low to date, the peak prices in May, 1920, follow (1913 being taken at 100):

As all of these Bonds have been subscribed for, this advertisement appears only as a matter of record.

### \$75,000,000 Commonwealth of Australia

External Loan of 1925 Thirty-Year 5% Gold Bonds

Dated July 15, 1925

Interest Payable January 15 and July 15

NOT REDEEMABLE PRIOR TO JULY 15, 1952 Redcemable, in whole or in part, on July 15, 1952, or on any interest payment date thereafter, on 60 days' notice, at 100% and accrued interest.

Coupon Bonds in denominations of \$1,000 and \$500, not interchangeable.

Principal and interest payable in New York City at the office of J. P. Morgan & Co., in United States gold coin of the present tandard of weight and fineness, without deduction for any Australian taxes, present or future.

The following statement in connection with this issue has been prepared from information furnished by the Right Honourable Sir Joseph Cook, P.C., G.C.M.G., the High Commissioner for the Commonwealth of Australia in London:

The Commonwealth of Australia is comparable with the Dominion of Canada in area, resources and importance to the British Empire. This is the first external loan which the Commonwealth has issued outside of the London market, where its securities enjoy the highest credit. Loans of the Commonwealth issued in London constitute a legal investment for Trustees in Great Britain.

Through the issuance of this Loan, of a 15,000,000 loan in London, and of a long-term conversion loan to be issued in Australia, the Commonwealth is providing for the refunding of short-term war debt which matures in December, 1925. OF ISSUE

The total gross debt of the Commonwealth as of March 31, 1925, amounted to \$2,101,759,763, consisting of \$282,351,498 external debt in the hands of the public (payable in London): \$428,726,995 debt to the British Government (to be amortized by 1956 under a funding agreement of 1921); and

The foregoing represents the entire indebtedness of the Commonwealth as it has no guarantees outstanding.

REVENUES AND

The ordinary revenues of the Commonwealth in the fiscal year ended June 30, 1925 (partly estimated), amounted to \$334,800,000, and its ordinary expenditures to \$325,200,000, resulting in a surplus of \$9,600,000. These figures do not include expenditures for public works or for certain non-recurrent charges consequent upon the war, amounting to approximately \$40,300,000.

MONETARY
The monetary unit of Australia is the pound sterling, the gold standard having been restored on April 28, 1925, coincidently with similar action in Great Britain, by the removal of restrictions on the export of gold. The Commonwealth Bank has the sole power of note-issue and on April 30, 1925, had \$276,856,285 of notes in circulation, against which it held a gold reserve of \$124,979,287, or over 45%.

All figures stated in dollars in the above statement have been converted from pounds sterling at par of exchange.

THE ABOVE BONDS ARE OFFERED FOR SUBSCRIPTION, SUBJECT TO ISSUE AS PLANNED, AT 991/2% AND ACCRUED INTEREST.

Subscription books will be opened at the office of J. P. Morgan & Co. at 10 o'clock A. M., Monday, July 20, 1925, and will be closed in their discretion. The right is reserved to reject any and all applications, and also, in any case, to award a smaller amount than applied for. The amounts due on allotments will be payable at the office of J. P. Morgan & Co., in New York funds, the date of payment (on or about July 28, 1925) to be stated in the notices of allot-ment. Temporary Bonds or Interim Receipts will be delivered, pending the preparation and delivery of definitive Bonds.

Application for the listing of the definitive Bonds on the New York Stock Exchange is to be made by the Commonwealth of Australia.

Telegraph Company declared interim
dividend of % of 1 per cent on the common shares and 1½ per cent on the
preferred shares, both tax free.

DOME MINES, LTD.

### SENTIMENT IN STEEL TRADE IS IMPROVING

#### July Buying Equals June-Bar Price Cut-Wage Reductions Begin

NEW YORK, July 20 (Special)— Sentiment in steel as far as the gen-eral public is concerned was the best last week for some time, as indicated by the popularity of the steel snare in the stock market, which rose gen ularity of the steel shares

Several bright features have been mpressed on investors. One of these was the idea that July will prove to be the turning point of the year in the industry; another was the statement of earnings of the Republic Iron & Steel Company in the second quarter, which proved a better showing than expected; a third reason was the optimistic outlook for U. S. Steel common extra dividends which many believe the discourse will declare as elieve the directors will declare at

Those who try to guess on probable developments before they are generally talked about are now keeping their ears to the ground for possible wage reductions throughout the industry. A prominent independent industry A prominent independent in spots. French loans we plate maker in eastern Pennsylvania will reduce wages on Aug. 1. An iron ore operator in Wisconsin has already reduced wages. Workmen's pay has been reduced lately in some other

lines of industry, notably the woolen manufacturing trade. In wage reductions, the independent companies usually lead, and the Steel Corporation follows, whereas wage advances are usually initiated by the corporation. It is not improbable that wages will be marked down throughout the industry within the next two months.

#### Steel Buying Steady

If wages come down the makers will point for justification to the low selling prices and the comparatively low rate of operations. Steel prices are now 41 per cent labove the prewar level, whereas the general average of all commodities is 55 per cent above 1913, according to the Bureau of Labor Statistics index.

The steel buying in July is about up to the June rate for the country as a whole, though in the east a fall-

as a whole, though in the east a fall-ing off is noted. That is due to the ing off is noted. That is due to the slump in fabricated structural steel, which is one of the chief steel commodities along the Atlantic seaboard. Thus, awards during the most recent week for which statistics are available were 15,000 tons, whereas the weekly average in June was 40,000 tons.

However, there is an abundance of structural business in sight, there being 19 pending projects involving 1900 tons or more each, the usual pending projects being 12. The larg-est undertaking involves 18,000 tons of steel for bridges for Pittsburgh. Another section of subway at New York will take care of 6500 tons.

#### Steel Bar Price Cut

Purchasing by railroads over the past three months has been a disap-pointment. However, some improve-ment is noted there. Pending rail in-000 tons of track accessories wanted.

The largest single rail request comes from the Norfolk & Western, calling for 46,500 tons. The St. Louis Southwestern is asking for 15,000 tons, the Great Northern wants 10,-

The important event from the price standpoint was the cut of \$2 a ton in steel bars to the automobile trade; they having sold at 1.90c a pound, Pittsburgh, after having been very firm at 2c for several months. The orders were very attractive, competition was keen and the conces-sions justified. The Ford Motor Comwhere a concession of \$1 a ton has been made, iron selling at \$17 a ton, furnace base. The threats of coal strikes, both in England and in the United States, give a somewhat bull-

#### Foreign Competition

Foreign pig iron dominates the price situation along the Atlantic seaboard.
About 11,000 tons of foreign iron is said to be in storage at Providence and Call Loans—Boston from 3000 to 4000 tons at the Army

Base at South Boston.
Indian fron has sold as low as \$20 a ton, duty paid, but Dutch iron, which is higher in silicon, holds at \$22 to \$22.25. Total sales of fron these days are averaging about 7000 tons weekly for each selling center of the country.

Pipe, both steel and cast fron, has become correliquently active. The Base at South Boston. Pipe, both steel and cast fron, has become conspicuously active. The Monolith Cement Company of California is asking for 40 miles of steel pipe, requiring 2000 tons. The Pan-American Petroleum & Transport Dompany, Los Angeles, wants 16 miles of 8-inch pipe. In cast iron pipe the city of New York is opening bids today on 6000 tons of 6 to 30-inch pipe. On 2200 tons of cast pipe for the On 2200 tons of cast pipe for the Panama Canal the French maker was low bidder but the Government has decided to readvertise, not favoring purchases from a foreign manufacturer. The Universal Pipe & Radiator Company, which recently expanded its line by securing an agency for French water and gas pipe, has just advanced its price of soil pipe \$2.50 a ton.

#### Copper Price Strong

Copper was the strongest of the to the movement. Official statistics as to production and shipments were issued during the week, and verified predictions previously made that stocks of refined copper on July 1 were the lowest since the war.

The American Brass Company advanced prices of its copper, brass, bronze and nickel silver products 4c

bronze and nickel silve: products 4cc a pound, bringing bare copper wire to 16½c a pound.

Buying was very strong the fore part of the week, but dropped off toward the close as prices climbed higher. The great bulk of orders was for the domestic trade, the export market dragging.

Lead was steady and rather quiet all week with the American Smelting

all week with the American Smelting all week with the American Smelling & Refining Company adhering to 8c a pound, New York, but in the outside market as high as 8.40c was paid. The St. Joseph Lead Company continued to sell at 8c, East St. Louis. British prices were below the American parity, so that no sales for export resulted.

The situation in zinc statistically

The situation in zinc statistically is so good that export business will not be needed for the next few weeks. Tin has plyoted around 58c a pound. Heavy American consumption has been offset by the threats of a coal strike in England.

#### AGITATION FOR LOWER BRITISH BANK RATE

LONDON, July 20—Agitation for the reduction of the British bank rate, regardless of the action of the New York Federal Reserve Bank, which has ruled the British rate since the war, has now replaced widespread fears that the restoration of the gold standard would mean a

higher bank rate. Since the gold payments were resumed, the bank has gained £6,000,000 sterling in its gold stock, whereas it was thought that gold would be exported to strengthen the dollar quotation. New gold has come from Holland, Russia, South Africa and elsewhere.

The bank's reserve notes and coin are now the highest since 1916, and the proportion of reserve to

the proportion of reserve to liability is also the best since that year. In view of the strong condition of the local money market, there is also strong pressure on the Government to remove the embargo against foreign loans, thus allowing London to compete in all outside London to compete in all outside loans with New York.

#### LONDON STOCKS IRREGULAR, WITH OILS CHEERFUL

LONDON, July 20-The stock market was irregular today, due to preparations for big speculative adjustments before the impending fortinightly settlement.

Increased threat of a strike of coal

miners is creating caution among traders. Rubber issues were irregular, due to adjustments. Oils were cheer-Industrials were in supply. Home rails were uneven, fears of labor

investors disliking the war new:

#### YEAR PROMISES GOOD BUSINESS

Harvard Economic Service says: The outlook for the last half of 1925 is for satisfactory money conditions and the continuance of a large volume

of business.

Caution and hand-to-mouth buying are not likely to disappear, however, and the seasonal expansion of business will probably be accomby the normal summer-to-auturcrease of interest rates. It is probable also that commodity prices will be relatively stable or will continue the moderate advance which has taken place since the middle of

### SPECULATION IN

caused the Danish kroner and Danish bonds to rise about 20 per cent in the last few weeks. This sudden rise, according to financiers, is beginning seriously to affect the various Danish industries, notably farming and ship-

lation in curerncy, the Danish farmers' organizations have demanded that the Government fix the gold value of the kroner at 20 per cent below parity. ointment. However, some improvement is noted there. Pending rail inutiries are now 80,000 tons, with 12.

realize how for centuries it has been bound up with the life of the people. Siena was originally divided into these contrade had quaint names, either of animals, real or fabulous, or of some object. Thus we have the Oca or Goose, the Onda or Wave, the woman, Mme. L. Mylones. Bruco or Caterpillar, the Torre or Tower, the Tartuca or Tortoise, the te Chiocciola or Snail and so on. Each contrada wears a characteristic cos-

through the narrow streets under the walls of the medieval palaces, end there is a great clamor of voices, while motors signal noisily as they

#### try to force their way through. The Fan-Shaped Plazza

The Piazza where the race is run is fan-shaped, and around it the horses must go over the track of earth laid down for the purpose. Up against the houses and encircling the Piazza rise the rows of stands where the spectators sit, unless they have paid a much higher price for a place in a window or balcony. In the center is a large fenced-in space, where anyone may stand without paying if

he does not object to being crowded. The horses are not trained animals, but ordinary beasts which are brought for inspection several days before the actual race and after being selected are given out by lot to the different contrade. Then follow three days trials, and then the great day. The city thinks of nothing else,

and all shops are closed.

Seven o'clock is the hour for start-Seven o'clock is the hour for starting, but long before, every seat is taken and every window and roof-top occupied. A shot is fired and all streets leading into the Plazza are closed, while the carabinieri ride played at headquarters of the Amer-

ing skill. It is an unusual sight to see this pageant passing on its bril-The beating of drums and the

bourg. + + + Tons of cargo and number of ships using the Panama Canal in May showed a decrease both from the previous month and the same month in that the invaders were able to win, 6—3, 3—6, 8—6. Baker's service would do would be to get up and see 1924. In May, 1925, 372 vessels passed through the Canal carrying 1.823,042 tons of cargo, compared with 417 vessels in May, 1924, carrying 2.685,670 tons of cargo. Tolls may readily be computed on the basis of approximately \$1 for each ton of cargo, almatch to three sets.

J. W. Ryan '28 and W. B. Evans ward, said Percy. "No, no, Percy will be J. Carlton, former Dartmouth College ace, and H. K. Lester turned trouble. I will come a ward, said Percy. "No, no, Percy will be accepted ace, and H. K. Lester turned trouble. I will come a ward, said Percy. "No, no, Percy will be accepted acc though the actual basis employed is that of net tonnage rather than cargo 6-4. The summary: The United States intercoastal traffic

also showed a decrease in May, 1925, from the same month a year ago. Westbound, 79 ships made the transit compared with 82 in May, 7924, carrying cargoes of 203,304 tons and 231,798

Eastward, only 60 ships made the transit between United States ports, against 87 in 1924 and tonnage dropped from 781.717 to 491.096. The reduction in traffic eastbound is attributed to the smaller volume of oil moving from southern California. An analysis of the origin and des-

Atlantic-bound business reveals a heavy decrease in cargo from the west coast of the United States, due again to smaller oil shipments, and a reduction in tonnage originating in the Orient. In the destinations of car-goes originating in the Pacific, goods moving to the east coast of the United States show a large decrease More than half the ships using the canal were of American registry.

The heaviest tonnage westward was of iron and steel, 107,000 tons, followed by mineral oils and eastward, of oils, 372,000 followed by lumber and

4 4 4 In a recent item appearing in this column the statement was made that the cost of operating the Majestic of the White Star Line on a round trip from Southampton to New York is \$40,000. This was a typographical error. The correct amount for a round

trip voyage is placed at approximately \$400,000 by an officer of that line. Two new freighters have recently seen acquired by the Eastern Steamship lines, including the "lake-type Shipping Board vessels Lake Bar-tholomew and Lake Floravista. both of which are now tied up at Staten Island, New York, having been out of active service for four years.
The total cost of the two ships, including reconditioning, is estimated not to exceed \$80,000. They will be

placed in the New York-Portland service, replacing the Cornish and the Wilton, making three trips weekly. The new ships are 251 feet long and of 4050 tons deadweight. Rotterdam is expected to take sec ports this year, according to advices received by the Departmentof Commerce. Hamburg is the leading port in tonnage handled, and the indications point to Rotterdam's taking second place over Antwerp, due to heavy ore shipments through the former port. In May, Rotterdam's onnage arrivals were reported to have exceeded Antwerp's by about

# GREAT POWER MUST BE USED

Radiocasters' Power Must Increase as the Square

This is the last of three articles dealing with the efforts of radio engineers to overcome the effects of static in order to insure better summer-time

ception under all conditions, the solution is not so easily achieved. It must be borne in mind that the radio-casting power goes up as the square of the signal strength. For instance, if a signal field strength 10 times as powerful is desired, then the radio-casting power must be increased 10 times 10 of 100 times. The same rule generally applies to the distance. If the distance spanned by the transmitter, with a given strength of signal, is to be doubled, the trans-

falls rather heavily on the radiocasters. Nevertheless, all-year-round erly used. radio is now the aim of radiocasters and radio sudiences alike, and more and more increased power transmitters are making their appearance. However, as yet there have been no real "super-power" radiocasting stations. One can hardly term a fivekilowatt radiocasting station a superpower station, since it is 10 times the power of most of the present stations. However the five-kilowatt, or "increased power" station is a real step forward and one which will be

powerful signal from the usual static lic's attendance.

but very temporary in its effects, and the electronic emission, instantly returning to normal, countinues to take care of the signals that follow, and without a continual "saturation effect" which blankets the signal. With old time tubes, in which the electronic emission was more limited, ordinary static impulses (or extra loud signals) boosted the electronic emission to the full limit almost continuously, with the result that the tube was temporarily paralyzed, re sulting in blurred, distorted signals. Present-day radiotrons may permit a background of static to come through when conditions are bad, but such themselves when the tubes are prop-

Recent trend in loudspeaker design sharply pitched so as to bring out the receiving sets, have been superseded by horns of less conspicuous but far more realistic tonal qualities. These later-day horns are capable of doing full justice to musical sounds while relatively dimming and submerging the otherwise sharp static cracks as compared to the older loudspeakers.

terial limitations, one wonders if the

gentleman in question knows any-thing of engineering, and equally pertinent, if he has ever heard the definition of the word "perfect."

But perhaps the answer lies in a statement a little further down on the publicity sheet, which states that through a prominent radiocasting station this corporation will give an hour of music by their "Wood-Wind Orchestra."

#### WGY HEARD IN BRITAIN ON 38-METER WAVE

SCHENECTADY, N. Y., July 20-Reports of distant reception of the short wave radiocasting of signals of WGY are already coming in, indicating that waves under 100 meters are getting out great distances, in spite of warm weather and the accompany ing static. Irvin N. Reeves, an American, living in London, Eng., reports under date of June 19 that he has been listening to the WGY signals on 38 meters "nearly every night and they have been coming through

in great shape."
"Now for the sake of Americans. abroad," writes Mr. Reeves, "please don't abandon the 38-meter broad-casting. It comes through with a punch and the daylight on this end does not seem to effect it. This morning at 5:15 the organ recital was still coming in fine and it was

bright daylight."
Programs of WGY are also radiocast on 109 meters and 1660 meters on experimental licenses 2XK and XAH, respectively. The 38-meter wave goes out as 2XAF.

### Question Box

405. Will you kindly tell me through your most valuable "Question Box," if a radio potentiometer can be used in place of a rheostat and if so would the resistance be the same as the potentiometer resistance.

W. K., New York City.

(Ans.) The windings on the average potentiometer are of wire so fine that it would hardly stand passing the current that a number of tubes would probably draw. You might try it connecting one side of the potentiometer and the center arm. We would hesitate to tell you what the results would be. The er arm. We would hesitate to to ust what the results would be octual resistance varies according to the point at which the arm rests, either on a heostat or potentiometer. When the rei heostat or potentiometer. When the re-sistance is given such as 30 ohms or 300 ohms it means that that is the maxi-num amount of resistance that the unit will give when placed in a circuit.

The nucleus of the American members is Harriet Chalmers Adams, F.R.G.S., who has followed 6:15 p. m.—Baseball scores; stock market quotations. 6:30—"Ye Towne Cryer." 6:40—Waldemar Lind and his orchestra. 7—Rudy Seiger's orchestra. 8—Russian program. 9—Program under management of Evelyn Ware. 10— (ameroons and who has not only Cameroons and who has not only written "Black Sheep" and two other charming books about life in the jungle forest of Africa, but has CHRISTIAN SCIENCE LECTURE ords; Gertrude Emerson, one of the editors of Asia, who has traveled by herself in Indo-China, India and the Philippines. She was one of the first American women to cross by sampan the submerged forest that

lies on the road to Angkor, lost city in Cambodia. Marguerite Harrison, under the auspices of the Christian who laughs at prisons, makes adven-science Churches and Societies of turous journeys to Sakhalin and last Science Churches and Societies of turous journeys to Sakhalin and last turous journey

the southwest; Rose Wilder Lane, whose "Peaks of Shala" records her journey into the mountain valleys of Albania; Blair Niles and Gertrude Matthews Shelby, both of whom have records as explorers in South

honor of the outstanding woman ex-Madame David over from Paris this autumn if they could. Blair Niles, one supposes, will make a speech miliar as the kitchen sink. Little
Madame David returns to Paris this
to write their books in Munchause about how the men explorers are not Madame David returns to Paris the week from Main Street, Lhassa, Ink. She has never forgiven to week from Main Street, Lhassa, Ink. She has never forgiven to be endowski for the unreachable romantic wildness of his book on Monwrite travel books. It makes life too hard for an honest woman who only puts down what she sees with party. Now we have Clare Sheridan her eyes open. That whole subject is a thing that has to be considered

One of the founders says that be-

women are intensely interesting to each other. They have an absurd fund of common jokes. Membership in the Woman Explorers seems to be exclusive on two scores. The woman must travel and make a publishable written record of the journey; going to the Hima-layas and simply wandering is of no account. And apparently it doesn't count if the woman explorer follows her husband. Mrs. Peary and the Snow Baby would not be eligible. The initiative, impetus, study and report must be the woman traveler's own. Going with her hus-band is no good, taking him along 50-50 might possibly wreck her standing as an independent person. Surprising as it may seem, how-ever, several hundred women with

The International Association of Woman Explorers avows no purpose -but to have a banquet. They pro-pose to have an annual feast in plorer of the year. They would hale people with the fiction touch to

now that Penelope is traveling. sides the banquet she supposes one or two of the members will meet and exchange yarns now and again and that they will pool their lore about baggage, hotels, servants and trails. The woman who travels alone is still a new species, and a queer one by old standards, hardy, valorous, patient and curious.

Interesting compilations made by the Department of Labor of the United States afford addi-

Industry's High Tax on Industry

tional proof of the fact that it is the tendency of industry in modern times to impose upon itself ever-increasing burdens. The process of taxation referred to is not direct. and perhaps it is by the operation of no reason-

able or sound economic law that it is exemplified in everyday experience. No doubt the effects noticeable are due to the more or less selfish efforts of one branch of industry to profit at the expense of all other branches, always with the hope that even though an artificial inflation of basic costs may compel a redistribution of the common burden there may remain for the acknowledged profiteer a somewhat larger margin of profit than would otherwise accrue.

The disquieting announcement is made by the department named that on June 15 of the present year the increase in the retail cost of food in the United States was about 9 per cent greater than for the year ending on June 15, 1924, and that for the twelve-year period from June 15, 1913, to June 15, 1925, the increase in the retail price of all food combined was about-58.5 per cent. To show the continuing tendency toward higher costs, it is pointed out that between May and June of the present year the average increase in food prices at retail was 2 per cent, and this at a period of the year when market and home gardens were beginning to yield an appreciable supply of vegetables and

fruits in many sections of the country. It is generally contended that the farmers are receiving only a slightly higher price for their products than formerly. In the main, perhaps, their returns are somewhat larger than in 1913, but this increase represents only a fraction of the flat 58.5 per cent shown as the increase in cost to consumers generally. No doubt it could easily be shown that not more than one-third of the 9 per cent advance in retail prices during the year ending in June last reached the pockets of the producers. With this condition made apparent, the pertinent query of the consumer and

the producer is, What is the remedy?

Of course it is admitted that the expense of retailing has greatly increased. No one can reasonably claim that the storekeeper is making a profit twice as large as in the years before the war. In many instances the margin between costs and profits is precariously small, despite the tremendously increased burden placed upon the consumer. This being true, the remedy must be found in more economic methods of distribution. And that has been said so many times that its repetition appears almost trite. But it must be said and insisted upon until there is brought about a revolution in the system that will assure the necessary relief. The products of the farm and garden, as well as those of the orchard and the mill, are handled too many times and by too expensive processes to make possible the elimination of multiplied costs, whether those costs are counted as profits or losses.

In previous discussions of this subject the statement has been made that there are too many retail stores. Convincing proof of this may be found in nearly every neighborhood in the larger cities of the United States. Even with the high rents paid, the necessity of paying higher wages to clerks and deliverymen, higher taxes, and higher living costs which the dealers themselves must meet, the number of retail establishments is constantly increasing. What is the result? The dealer with an established trade is forced to see some of his customers go over to his new competitor. His expenses do not automatically decrease. His gross profit account must be maintained by some method. and the simplest and most natural course is to increase his percentage of profit. This cannot be done in a day or in a week, but it can be done gradually, just as the figures presented show that it is being done. Nine per cent in a year, and 58.5 per cent in twelve years, show how the retailer has protected himself at the expense of both the producer and consumer. And yet he has not become rich.

It is a practical reversal of an old theory to insist that, under the conditions shown, competition actually tends to increase the cost to the consumer. But there is no other sound conclusion to be reached upon the showing made. Losses upon perishable products increase in direct proportion as the number of buyers in a given store decreases. These losses are, more than theoretically, charged to overhead costs. The consumer pays, in the end, for the privilege of "shopping around." The chain stores, even though able to greatly undersell the individual competitors, uniformly gauge their prices to correspond with those prevailing in the communities where they are established. They benefit, whenever possible, from the prevailing standard of retail costs.

A news item to the effect that a representative in the United States Congress from a New York

An Interesting Experiment State district will attend a special course in economics given at Cornell University, may have suggested to the casual American reader nothing more than the reflection: "Would that all our national legislators

would do likewise!" That most of the questions with which the Congress has to deal are, directly or indirectly, related to some economic problem, and that laws designed to remedy existing grievances should be enacted only after a careful study and co-ordination of the fundamentals applying to the particular issues involved, will be readily conceded. Without the knowledge that can be derived only from the assembling of pertinent facts, and consideration of their relation to measures proposed for the public welfare, lawmaking is largely a matter of the pressure of private interests, er of trading between conflicting forces, representing regional groups or industrial activities.

That the persons selected as candidates for what is in effect a great business body, since I government of others. We concede much to tem-

its enactments have a direct bearing on all industry and commerce, should be well informed concerning the subjects upon which they will be called to legislate, would seem so manifestly desirable that it might be supposed that this qualification would be stressed by those active in pressing the claims of any particular nominee. A reference to the contests over nominations for membership in the Congress will

hardly show that any special acquaintance with economics was the determining factor in securing a nomination or election. Party service in a state legislature, or in some other capacity; ability as a "campaign orator," or pressure from some group that wished to have its interests furthered at Washington, has too often decided the choice of candidates submitted to the voters for their approval. in how many congressional election contests can the reader recall appeals having been made for a candidate, on the ground that his training and equipment qualified him for aiding in the enactment of laws relating to great economic issues?

Should the example set by the Representative from New York State be followed by any considerable number of his associates in the House, one result should be the recognition in the Congress that economic laws are not sectional, regional, or even national, but apply to all countries and all peoples, irrespective of artificial divisions of the earth's surface. With this realization that the natural laws of production and exchange operate for the greatest good to the greatest number, there may develop a consciousness that possibly too many statutes have been enacted without any economic justification, and that the repeal of many existing laws is more desirable than continued efforts to restrict, regulate and control industry and trade.

Former soldiers of the famous Canadian corps did a good day's work for world peace when the Dominion con-

Canadian Men for Peace Plan vention of the Great War Veterans' Association recently carried the resolution for the conscription of material resources as well as of men. The resolution called upon the Domin-

ion Parliament "to consider legislation to mobilize the whole power of the Nation for national service in the event of a declaration of war; that the property equally with the persons, lives and liberties of all citizens shall be subject to conscription for the defense of the Nation." The Canadian men further commended the resolution to the serious consideration of the biennial conference of the British Empire Service League, which met in Ottawa immediately following the Dominion convent

One of the representatives of Canada at the larger conference, Capt. Ian Mackenzie, M. L. A., of Vancouver, B. C., again moved the resolution, for the serious consideration of comrades from the many nations under the British flag. The British League, whose patron is the Prince of Wales, accepted the resolution as presented for serious consideration. The Canadian spokesman did not urge that it should be carried forthwith, but believed that it should be submitted to the various constituent members of the exservice men's organization for discussion. Representatives from Scotland, New Zealand and Australia spoke in favor of the Canadian resolution, while others indicated by applause that they were likewise heartily behind it. Gen. Sir A. H. Russell, former commander of the New Zealand expeditionary force, mentioned that the New Zealand Defense League has already given its indorsement to a similar measure for that Dominion.

The conference followed a sound course in referring the resolution to the headquarters command of the British Empire Service League in London, for action. Before the next conference is held, which may be in Australia in 1927, the proposal as outlined will have been submitted to the organized ex-service men in Australia, British Guiana, Canada, England, India, Irish Free State, North Ireland, Malaya, Newfoundland, New Zealand, Rhodesia, Scotland, South Africa, Wales and wherever else there is a branch of the organization.

In moving the resolution, the Canadian representative made it clear that he favored it as a peace measure. He spoke of the apparent futility of war, and of the duty of ex-service men to give attention to the problem of world peace. Field Marshal Earl Haig, grand president of the British Empire Service League, followed the discussion without taking part in it, but at the close of the conference he spoke, as he has done on former occasions, of the necessity of working for peace through unity, friendship and good understanding. With hearty co-operation between the American Legion and the British League, the ex-service men are looking toward peace along practical paths.

Inspirational writers since time immemorial have sought to impress upon a more or less

Applying

an

Age-Old

Moral

careless people, by story, ballad and drama, the fact that not always in some other country or in some distant town or city will one find one's heart's desire, whether in riches, fame, pleasure or

contentment. They have invited us all to go with them in their self-imposed rôle of historian and biographer, to observe and record the ineffectual search for what always proves to be the unobtainable. And we remain, figuratively, during the days or years of disappointing experiences, returning, in due season, like the Prodigal of old, to find, in the home left behind when the journey was begun, all that is desirable or needful, and of good things

'enough and to spare." But the lesson seems not an easy one to learn. Perhaps, like some other indisputable theories of everyday existence, we may all admit the correctness of the main point sought to be established. Yet in human experience the temptation is to imagine one's self exempt from the application of those rules of conduct which all are ready and willing to commend for the regulation and

perament, peculiarities of taste, habits of thought and special circumstances, where we ourselves are concerned, often bemoaning the fact that humanity itself is perverse, obstinate and perhaps selfish.

Just at this season of the year, when many thousands of Americans, as well as others, are planning and discussing prospective vacation pleasures, really serious thought should be devoted to the lesson all have learned, but which few have actually applied in their own experiences. The temptation too often is to imagine that beyond some distant horizon lies the land of delights and pleasures unalloyed. We fare forth upon the search, sometimes successful in a measure, sometimes vain and disappointing, for-

getting that in the very environment from which

we seek to escape may be found the contentment and happiness which, after all, do not belong to

places, but lie within ourselves. In nearly every section of the United States, and especially in those localities contiguous to the seacoasts, the Gulf, the Great Lakes, and the mountains—and there are few localities far removed from these—there lie at hand and easily accessible by present-day means of transportation spots beautiful to look upon and pleasant as temporary abiding places. Distances lose their charm and attraction when one takes account of these things close at hand. And for those who look a little closer there are vacation grounds even nearer their homes. In New England, particularly, the hills and fens extend a year-round invitation to the lightly caparisoned tourist who has learned, by observation or experience, that home is not the least attractive spot on earth.

It would be difficult to find a much more praiseworthy ideal than that recently announced by the General Federa-

Raising the

Standard of

the American

Home

tion of Women's Clubs. at the opening session of the Woman's Club Institute at Chautauqua, N. Y., namely, the task of raising the standard of the American home. The

fact, therefore, that this goal was emphasized, as the most important project before the women of the Nation, by Mrs. John D. Sherman, president of the federation, need not be seen as an exaggeration. And her inauguration of a new department of the federation, to be known as "The American Home," as her first official act upon becoming president, is a perfectly logical step, because, as she averred, the organization which she represents has recognized the necessity for the improvement of the American home, and is determined to make a strong effort to raise the standard.

That the importance of the goal of raising the standard of the American home is recognized does not, however, mean that the American home, as it is at present, is lamentably below standard. Indeed, probably if a general average was struck of many nations of the world, it would be found that the American home would rate well up on the list. But this fact, on the other hand, does not signify that there is no room for improvement.

So far as the program mapped out for the federation by Mrs. Sherman is concerned, it must be acknowledged that the ground is covered more than completely. "Our program covers a wide range of subjects," she said, "from the well-being of the family to its moral and spiritual development; from the material structrue and equipment to the atmosphere inside the house; from the financial business of running the house to the education in fundamental religion, character building and the artistic value of art, music and literature." And this is not all, for she added that the federation intended to show the home woman the relationship of the thing called "politics" to the comfort and education of her children.

This is, indeed, an ambitious program, and it is but fair to point out that therein resides any danger that may lie hidden in it. The American people pride themselves, and rightly, upon the fact that they are individualistic in their habits and tendencies. No organization would wisely challenge this individualism because of certain possible deficiencies in management obyious to an outside investigator. While the federation is to be commended upon its main intent, it should be careful not to overstep the bounds of due propriety.

#### Editorial Notes

A correspondent to a New York newspaper recently contributed a letter, the last sentence of which read, "Who said tipping was an evil?" In it he told of his experiences in a New York hotel where he had attempted the experiment of living ten days without giving any tips. His experiences were summed up in the following somewhat harrowing account:

Eight days at the hotel and then: different waitress at each meal All the tidbits on the menu exhausted, however early

No soan in the bathroom; one towel instead of two. The switchboard operator deaf to my calls; the bellhops glued to their seats when I arrived with a grip. The whole staff on strike, so far as I was concerned, after ten days.

And yet while all of the foregoing experiences undoubtedly occurred exactly as stated, that fact does not warrant in the least degree an affirmative answer to his question.

President von Hindenburg merits po little praise for sanctioning the revaluation law, whereby a total obligation of the German Government amounting to 70,000,000,000 marks will be converted into a gold debt of 3,500,000,000 marks. For by this proceeding he is definitely destroying any hope of regaining his fortune, It is said that personally he would have preferred leaving unsigned a law which disappoints the classes who sacrificed their all to invest in war loans, but the measure has the approval of the majority parties. This law provides for the exchange of securities of war loans and pre-war German Government loans held by German and foreign subscribers, for a new loan equal to 5 per cent of the original loan. President von Hindenburg, his sister and his brother placed their entire inherited fortune in the war loans.

#### British Politicians as Press Men

By SIR ALFRED ROBBINS

When William Jennings Bryan was President Wilson's Secretary of State, he aroused much criticism on his own side of the Atlantic, some of which was echoed on the other, because, while in the midst of his heavy official duties, he gave a series of popular educational lectures. Those who recall the arguments-and even the epithetsemployed in that controversy have been interested and possibly amused by their repetition in the one-momentarily ended in Britain-evoked by certain recent newspaper contributions from the Earl of Birkenhead, King George's Secretary of State for India.

For some time that storm had been brewing, and suddenly it came to a head with a vengeance, newspapers to which this distinguished and disturbing figure in English public life did not specially contribute protesting as lustily in what they claimed to be the public interest, as the Institute of Journalists in the interest of the professional newspaperman.

The Prime Minister, quick to perceive the storm, tried

t first to trim his sails to meet its force. But a formula that did not meet the true point raised, simply made the breeze blow stronger; and, in the end, Mr. Baldwin was constrained to yield to what appeared a general demand-that ministers during their period of office should make no contributions to journalism. This counsel of perfection, while seeming to settle the matter, brought at once a developed contention into the

field; and this latter raises a problem not at all as easy even temporarily to dispose of as the earlier. The Prime Minister was immediately besought in a friendly quarter to "win fresh laurels by turning his attention to the journalistic indiscretions of ex-ministers also"—with special reference, as it seemed, to ex-Prime Ministers. These apparently-and they number Lord Rosebery

and Lord Balfour, as well as Lord Oxford and Asquith, David Lloyd George, and Ramsay MacDonald-are to be prevented by a pension from writing for newspapers such remembrances of their public life as include refer-

ence to state affairs.

It may be doubted whether the author of this proposal had any conception of the loss to history such a rule, if strictly adopted in the past, would have involved. Without the "Memoirs" of the stately and severe Sir Robert Peel, the English people would have known little of the true inwardness of the two great political convulsions of his life: the yielding to the Roman Catholic claims to participation in public affairs and the repeal of the Corn

But for a book written by the first Earl Russell, long after he had been Prime Minister, just as little would have been revealed of the inner history of what is known in England as "the great Reform Bill." Mr. Gladstone was not Prime Minister but was striving to become so when he wrote his "Chapter of Autobiography," which told the world his inmost strivings on the then burning question of the Irish Church Establishment.

And the idea of preventing by a pension any one of these solemn statesmen from thus telling the truth about themselves and their colleagues would have moved them

Yet-the very fact of such a proposal being put forward in a responsible quarter indicates a danger to the full

exercise of democratic government which is increasingly evident to the student of English affairs. The whole tendency of modern reform has been to remove the old idea -to many it seemed the old reproach—that Parliament was a preserve for the rich and leisured classes, into which the worker for a living intruded at peril of

privation. The rapidly growing group of Labor representatives first roughly disturbed this long-accustomed serenity, and the earliest fruit was that the old academic Radical cry for payment of members was translated into an actual £ 400 (\$2000) a year, with a free railway pass to and from their constituencies, later on. This was to make entrance a little-though, with the present cost of living in England, only a very little—easier to the man unpossessed of a rich father or an assured fortune.
But, when once at Westminster, the member's in-

stinct is to seek for promotion to ministerial rank. When he receives it, the pay is not great, while the position is precarious. He is solaced, however, by reflection that, f and when ejected, he can return to the practice of his business or profession. Apparently, it is now sought to prevent this by pension in one direction, and one direction alone. It is the journalist who is to be singled forth for special treatment.

Journalism has so long been characterized as a career open to the talents that it comes with a shock to find it so suspect in England still. Arguments which may apply to men actually in office, and paid for their services by the state, are inapplicable to those outside. If it be betrayal of state secrets that is feared, this is a peril not to be averted by pensioning ex-Prime Ministers alone.

Every man who has been Secretary of State, whether for foreign, home, dominion, military, or Indian affairs, could reveal such if he wished, of as great gravity as he who had been their chief; and these are not the only ministers of whom much the same can be said. It is not by either retail or wholesale pensioning that any possible danger of the kind suggested can be turned aside. The only safe rule is to choose trustworthy men for ministers,

and then trust them thoroughly. A ban on a return to his old calling, when a minister has left office, cannot be laid on one calling alone. A business man can go back to his factory or counting house, and a lawyer to his practice at the bar, after he has quitted a ministry; and no law is likely to be carried preventing a journalist returning similarly to his desk.

But the danger which lies beneath all such suggestions is that of limiting to the dull the business of government, and preventing the bright from undertaking it. There have been few moments in Britain's history when greater acuteness of perception and alertness of thought were needed for the solution of her almost overwhelming problems. A mixture of all kinds of professional training and mental quality is required, and its ingredients should be sought impartially from every side. The man who inherits an estate, who runs a large factory, who speculates himself into a fortune, and who is trained to per-ceive and to guide public opinion, has a place in public life equally with the man who, as the old French phrase had it, simply took the trouble to be born. The future of democracy will lie, indeed, with the broad spreading of its net for those earnestly desiring to give it service.

### The World's Great Capitals: The Week in Moscow

Moscow, June-26 Leonid Krassin, the Soviet Ambassador to France and Commissar for Foreign Trade, has recently returned to Moscow from France to report on the progress of the negotiations between the Soviet and French representatives in Paris and to obtain fresh instructions from his Government. Mr. Krassin declared that the expert committees which have been working over the problem of establishing the amount of Russia's pre-war obligations to France have agreed on an approximate sum considerably smaller than is generally given in this connection. Methods of settlement have not yet/been discussed. Mr. Krassin further stated that, although Russia had placed orders to a value of 100,000,000 francs in France, the unchanged attitude of the French capitalists and financiers and their theory of not opening trade until disputed questions are settled prevented the development of commercial relations between the two countries. 4 4 4

An automobile race from Moscow to Tiflis will take place in the near future, and a number of American firms have asked to enter the competition. The roads for the intended race have already been inspected and have been found passable. The last lap of the journey will lie over picturesque Georgian military road, directly across the Caucasian range from Vladikavkaz to

The Georgian manganese concession to the W. A. Harriman interests is still in the forefront of public attention. Mr. Minkin, a member of the concessions committee, declared in a recent statement that this concession is not to be interpreted as an abrogation of the policy of the Soviet Government of giving preferential treatment to citizens recognized the Soviet Union. Mr. Minkin added that for a time German and British interests were in the field as competitive bidders for the manganese concession, and only the fact that the American offer was more advantageous from a business standpoint brought about the rejection of the German and British offers.

A recent and somewhat unexpected development in the Soviet motion-picture world is a film produced apparently for the sole object of extolling the merits and advantages of thrift. It is called "The Wonderful Book," and attempts to illustrate Mark Twain's reported adage 'My most valuable book is my bank book." The audiences are shown the practical advantages of saving; and the pictures are accompanied by rhymes which might have delighted the heart of Benjamin Franklin and other prophets of thrift. The film also includes pictures of various Moscow municipal improvements, including the new busses, which are steadily growing in number and

The Musical Studio of the Moscow Art Theater, which will appear in the United States next fall, concluded its Moscow season with a performance of three sketches, a poem by Pushkin, with musical accompaniment by Rachmaninoff, "Bakhchisaraisky Fountain," with musical accompaniment by Arensku, and "Egyptian Nights," with musical accompaniment by Gliere. These sketches were somewhat lighter in substance than the Musical Studio's regular performances, such as "Car-mencita," "Perikola," and "Lysistrata," but the Oriental decorative effects were very beautiful, especially in the case of the two latter compositions.

The Young Pioneers, the junior Communist organization, made up of youths of Boy Scout age, held a large meeting on Sparrow Hills, now renamed Lenine Hills, in honor of the Congress of the Communist Youth which is now taking place. 'Some thousands of Pioneers appeared at the meeting and took an oath to carry out the commandments of Lenine and support the workers and peasants of the whole world in their struggle for freedom.

The problem of caring for the million unemployed in the Russian cities continues to excite a good deal of attention. According to the latest figures about half the unemployed receive state aid, in one form or another Some 300,000 receive a direct monthly pension, and 80,000 unemployed have been organized in co-operative groups engaged in trade and hand industries. The program of public works designed to help the unemployed has also been considerably extended. Among the measures recommended for combating unemployment in the future are increasing public works, opening dining-halls and light refreshment places where free meals will be served, and establishing vocational schools. 4 4 4

Mr. Sokolnikoff, the Soviet Commissar for Finance, recently declared that, according to preliminary estimates, the harvest this year will exceed its predecessor by 500,000,000 bushels, thereby leaving the country with a surplus of grain for export. Next year's budget, according to Mr. Sokolnikoff, will reach the figure of 3,500,000,000 rubles. If this figure is reached, it will represent a gain

of about 1,000,000,000 rubles over this year's budget, and the Finance Commissar observed that this would permit the more adequate satisfaction of the cultural demands of the country. Mr. Sokolnikoff asserted that the illegal manufacture of vodka had made prohibition enforcement in Russia impossible, and added that considerable additional revenue would be derived from the alcohol try next year, although he promised that definite limits would be imposed upon the use of alcohol.

4 4 4 This autumn will mark the thirty-fifth anniversary of Fyodor Chaliapin's artistic debut, and friends of the great Russian singer in Moscow declare that he is anxious celebrate this occasion in his native country. Challis pin's appearance on the Russian stage would certain'y be greeted with a tremendous outburst of applause.

Letters to the Editor

Prohibition and the Welfare of Mankind

To the Editor of THE CHRISTIAN SCIENCE MONITOR: One of the common sayings of the day, "Prohibition is a farce," is often repeated by those who wish to drink or to sell liquor, but is denied by those who know what the Eighteenth Amendment has thus far accomplished

and who are in sympathy with those results. I have a warm, friendly feeling for all America's allies in the World War, and realize their especial need for a strong export trade at this time. Furthermore, I comprehend that by many Europeans wine is probably considered as beneficial as milk, and selling liquor as

honorable as selling gloves. But I wish all American readers could know that certain papers in the United States are working diligently for the European liquor interest, and that many occasional paragraphs hostile to prohibition seen in other papers probably emanate from this same European

L'Exportateur Français, a French commercial journal. commented not very long ago upon the success of the anti-prohibition movement in Canada, claiming for the Commission for Exportation of French Wines a large

share of the credit for success: Our action assumed the most diverse forms: drawing up of tracts and pamphlets, editing of the latter and their

distribution throughout Canada, press publication and con-troversies, furnishing of funds at the right moment. The French Wines Exportation Commission was able to note last year already that its publicity campaign in the great newspapers edited in the English language in the United States (New York Herald, Chicago Tribune, Daily Mail) had given rise in the American press to many numerous comments highly favorable to its cause and had given a greater impulse to the anti-prohibitionist literature of both continents.

Because liquor is still used in the United States in defiance of the law, Americans are hardly justified in pronouncing the amendment a failure. Even if the reform has not yet accomplished all that was hoped for it, that it has already done much is unquestionable.

It must be remembered that cases of intoxication seen on the street, rare as they are now in proportion to former numbers, are magnified and multiplied in carcless speech. Moreover, to the complaint that prohibition has wrought evil by introducing noxious drinks, it can be answered that many more fatalities resulted from drinking before prohibition than in an equal time since the enactment of prohibition, notwithstanding the dangerous substitutes. This fact seems to be commonly unknown or ignored, but the records exist.

It should be possible to discuss prohibition without bitterness. The first thing is to agree on the point of view. To certain rules of safety sane individuals generally submit; as that matches are unsuitable playthings for children, or that persons on street crossings should respect the preferences of the traffic officer. The consensus of opinion is that it is to the advantage of the race to obey these rules, and such liberty as they invade is surrendered more or less cheerfully.

The advocates of prohibition would be glad if the welfare of mankind could be recognized as a more urgent motive than the gratification of the senses. Then, with agreement as to what constitutes the welfare of men, probably the somewhat childish resentment at being controlled would disappear, because in time self-control would render compulsion unnecessary.

of the most significant signs of the times is the demand that men shall examine their opinions and loyally accept proven truths as they appear. We are warned against holding ideas blindly and defending them with obstinacy, instead of weighing their value. The first step is to examine facts fearlessly; the second is to pender upon them and follow their leading.

Americans owe it to themselves and to the coming generations to study the argument for prohibition and the results it has thus far accomplished. Worcester, Mass.
